

Is internethogares.co legit? TrustSniffer's high-trust assessment: 100/100

internethogares.co

Verdict

100

OUT OF 100

HIGH TRUST

internethogares.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 70%.

What this site appears to be

Spanish-language Colombian sales page promoting Tigo home internet, television, mobile bundles, and premium content. It provides recurring prices, introductory-period conditions, service limitations, legal provider identities, privacy terms, physical addresses, telephone contacts, and forms authorizing sales callbacks.

Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a Spanish-language Colombian telecommunications sales portal offering Tigo home internet, television, mobile bundles, and premium entertainment subscriptions, with revenue derived from recurring service plans, optional add-ons, and promotional introductory pricing arranged through a disclosed commercial agent.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, or adverse threat-reputation findings were observed. The site's historical continuity, clean external reputation, and consistent telecom-focused presentation support its legitimacy as an established commercial sales channel. Its callback form requests personal information with explicit consent, but does not contain a login mechanism, conceal hidden fields, or submit credentials to an untrusted destination.

- The homepage identifies itself as "Internet Tigo Hogar | TIGO®," and automated page inspection found no suspected brand impersonation or phishing indicators.
- Domain provenance shows registration in 2020 (~5.72 years old).
- The web archive contains 53 snapshots spanning 2020–2026 (7 years tracked), with no detected suspicious repurposing or semantic drift.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no reported abuse, and inclusion within the top 1 million globally ranked domains.

Regulatory Verification Notes

The homepage identifies Be Call Outsourcing S.A.S. as a commercial agent for UNE EPM Telecomunicaciones S.A. and Colombia Móvil S.A. E.S.P. It also presents privacy terms, physical addresses, telephone contacts, service limitations, and promotional conditions. No specific licence or regulatory registration number was observed; given the site's role as a telecom sales landing page rather than a financial service, this is a limited disclosure note rather than evidence of illegitimacy. No matching broker-related reputational record was identified, and no financial-regulation inference should be drawn from that absence.

- The homepage expressly names the commercial agent and the two telecommunications providers on whose behalf it operates.
- The homepage includes personal-data processing language and affirmative consent for contact through digital channels.

- The site is served from AS13335 (Cloudflare, Inc., US).
- The site's transport encryption uses a WE1-issued DV TLS certificate, valid to 2026-10-19.

What to Verify Next

Before entering a new subscription, the prospective customer should independently confirm that the displayed sales telephone number and commercial-agent relationship remain authorized through an established Tigo customer-service channel. The final order should be checked against the published promotion period, post-introductory pricing, geographic availability, installation conditions, and the scope of consent for subsequent marketing contact.

- The homepage publishes a dedicated sales line and a separate customer-service number, enabling independent channel comparison.
- The advertised Full Tigo offer starts at COP 119,900 and states that included promotional benefits apply for one year.
- The homepage states that the displayed promotion is valid through 31 July 2026 and directs customers to applicable terms and conditions.
- The callback-request form requires authorization for personal-data processing and permits contact through multiple digital platforms and at special hours.

Summary Verdict

The website presents as a legitimate, established, and trustworthy commercial service portal. Its identity, operational content, historical presence, technical controls, and external reputation converge without material contradiction, supporting normal customer engagement.

Infrastructure Integrity

The site is protected by Cloudflare's CDN/WAF, with all four observed IPv4 and IPv6 addresses operating as edge nodes rather than exposed origin infrastructure. This reduces direct attack-surface exposure and is a meaningful security mitigation, although protective infrastructure alone is not evidence of business legitimacy.

Closing Assessment

Normal interaction, including submitting a sales enquiry, accessing an account where offered, and completing standard service transactions, is appropriate using ordinary consumer safeguards.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of internethogares.co.

- The request stayed on internethogares.co. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2020-11-09. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about internethogares.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
