Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Intershop.com is the corporate website of Intershop Communications AG, presenting B2B ecommerce software and related enterprise services for businesses. Its apparent business model is conventional enterprise software licensing, subscriptions, implementation, and support rather than investment or financial-return activity.

Scam/Impersonation Risk

No contradictions were observed. The site identifies a coherent corporate software business, provides substantial business and privacy content, and shows no phishing, brand-impersonation, malicious-form, or deceptive financial-return indicators. External reputation checks found no malicious or suspicious findings, supporting the conclusion that the website is legitimate and established.

EVIDENCE

- The homepage presents Intershop Communications AG as a B2B commerce software provider.
- The page analysis found no phishing indicators, sensitive forms, hidden forms, or suspected brand impersonation.
- Domain registration: 1996-09-18; age 29.89 years.
- The domain is within the global top-million traffic footprint.

Regulatory Verification Notes

The corporate presentation supports a clear enterprise-software identity and describes software licensing, subscriptions, implementation, and support. No financial-services license is stated in the available page content; this is a transparency item for contractual or regulatory due diligence, not evidence of deception. Registration uses InterNetX GmbH, while the registered organization is Intershop Communications AG; any owner-privacy setting is an administrative matter.

EVIDENCE

- The corporate page identifies Intershop Communications AG and describes its B2B commerce activities.
- Cookie and privacy content explains analytics, advertising, embedded media, third-party processing, retention, and consent withdrawal.
- Hosted on AS49885, INTERSHOP Communications AG, Germany.
- TLS certificate issued by YE2, DV validation, valid to 2026-09-11.

What to Verify Next

For a prospective commercial engagement, confirm the contracting entity and applicable service terms in the relevant order or agreement. Where a proposed arrangement would involve regulated financial activity, independently confirm the applicable authorization with the relevant official registry. Review the site's privacy settings before enabling optional third-party content or analytics.

EVIDENCE

- The available corporate content describes enterprise software services rather than regulated financial products.
- The privacy interface provides separate controls for streaming, analytics, advertising, and third-party functions.

Summary Verdict

The website presents a high-trust posture consistent with a legitimate, established enterprise technology provider. Its identity, business model, technical operation, and external reputation converge without observed scam, impersonation, phishing, or identity-conflict indicators.

Infrastructure Integrity

The site resolves directly to one identified German host operated by INTERSHOP Communications AG on AS49885, with no CDN detected. The valid DV TLS certificate provides transport protection, while the directly attributable hosting arrangement is a mitigating infrastructure signal rather than proof of legitimacy by itself.

Closing Assessment

Normal interaction, including account login and standard account actions, is appropriate; ordinary enterprise due diligence should accompany any material contractual commitment.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of intershop.com.

- The request stayed on intershop.com. It was not redirected to another domain. CLEAR
- Registration is published under InterNetX GmbH. CLEAR
- DNS for this domain is served by iks-jena.de, across 2 name servers. NOTED
- The registration is paid up to 2026-09-17. NOTED
- It is hosted on INTERSHOP, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about intershop.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
