

Is inthemarket.co.kr legit? TrustSniffer's high-trust assessment: 90/100

inthemarket.co.kr

Verdict

90

OUT OF 100

HIGH TRUST

inthemarket.co.kr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 60%.

What this site appears to be

Korean ecommerce marketplace homepage for 인더마켓/온누리물 featuring a large catalog of groceries, fresh produce, meat, seafood, appliances, household goods, and other products. It emphasizes coupons, agricultural and seafood subsidy discounts, digital Onnuri certificate eligibility, reviews, timed promotions, app downloads, login and registration, non-member order lookup, and customer support.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is a Korean ecommerce marketplace operating as 인더마켓/온누리물, presenting a broad catalogue of groceries, fresh produce, seafood, consumer electronics, household goods, beauty products, clothing, and other merchandise. Its apparent business model combines retail sales, merchant participation, and promotional placements, with coupons, agricultural and seafood discounts, digital Onnuri gift-certificate eligibility, timed promotions, product reviews, account services, and non-member order tracking.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, malicious reputation findings, or confirmed abuse patterns were observed. The site's long-running provenance, stable marketplace content, established traffic footprint, and clean external reputation converge in support of a legitimate commercial operation. The homepage login capability is consistent with ordinary ecommerce account functionality; testing found no hidden forms, external password submission, cloaking, wallet-draining behavior, clipboard hijacking, or suspicious inline scripts.

- The homepage identifies itself as an ecommerce marketplace and provides product pricing, promotions, reviews, registration, login, non-member order lookup, and customer-service functions.
- The domain has an authoritative reconciled age of approximately 7.16 years; WHOIS records separately show registration on 4 August 2020 and an age of approximately 5.99 years.
- The web archive contains 19 snapshots spanning 3 June 2019–1 December 2025, covering 7 tracked years, with no suspicious repurposing or semantic drift detected.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, no abuse reports, and placement within the top one million globally at rank 194,649.

Regulatory Verification Notes

The available homepage does not establish that the marketplace claims a regulated financial or brokerage status, and its ordinary retail model does not itself imply such a status. Digital Onnuri certificate acceptance and references to agricultural, seafood, and food-voucher programs are presented as payment or promotional features rather than investment products. The supplied page evidence does not resolve the full set of legal-entity, merchant-registration, program-participation, or consumer-protection disclosures; this is a limited disclosure-verification point, not evidence of fraud or illegitimacy. No corresponding entry appeared in the supplied broker-intelligence context, but that result is not a legal or licensing determination.

- The homepage presents digital Onnuri gift-certificate eligibility, agricultural discounts of up to 36%, seafood discounts of 20%, and food-voucher acceptance as shopping benefits.
- WHOIS identifies the registrant as “woonongmulsan,” the registrar as Gabia, Inc., and the registration expiry as 4 August 2027.
- The site is served from AS9286 by KINX in South Korea; its observed server address is 121.78.246.77.
- The site’s transport encryption uses a valid DV certificate issued by GoGetSSL RSA DV CA, valid through 6 December 2026.

What to Verify Next

For institutional onboarding or material purchasing relationships, the marketplace’s legal operator, business-registration details, refund terms, merchant responsibilities, and eligibility for the advertised certificate and subsidy programs should be matched against the relevant official records and contractual documentation. Official customer-service channels should also be confirmed independently before establishing a recurring commercial relationship.

- The homepage displays a customer-service telephone number, weekday operating hours, a dedicated customer-centre route, notices, frequently asked questions, product inquiries, and partnership inquiries.
- The homepage offers both registered-account purchasing and non-member order lookup, creating identifiable transaction and after-sales workflows.
- The homepage advertises named promotional programmes and benefit eligibility whose terms can be compared with the corresponding programme documentation.

Summary Verdict

This is a legitimate, established, and trustworthy ecommerce website with no observed contradictions. Its coherent commercial identity, sustained provenance, conventional transaction functions, and clean threat-reputation profile support normal interaction, including account login and standard purchases.

Infrastructure Integrity

The site uses valid encrypted transport and identifiable South Korean data-centre hosting. This provides a conventional and accountable delivery posture, although infrastructure controls are mitigating technical signals rather than independent proof of business legitimacy.

Closing Assessment

Prospective customers may use the site normally, applying routine ecommerce due diligence to seller terms, payment records, fulfilment, and returns, while institutions should complete standard counterparty onboarding before material commitments.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of inthemarket.co.kr.

- The request stayed on inthemarket.co.kr. It was not redirected to another domain. [CLEAR](#)
- Registration is published under Gabia, Inc.(http://www.gabia.co.kr). [CLEAR](#)
- DNS for this domain is served by rootnet.kr, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-08-04. [NOTED](#)
- The earliest public archive of this site is from 2019-06-03. [CLEAR](#)
- It is hosted on KINXIDC-AS-KR-KR, from a server in KR. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about inthemarket.co.kr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
