

Is intiamaranto.com a scam? TrustSniffer's high-risk assessment: 0/100

intiamaranto.com

Verdict

0

OUT OF 100

CRITICAL RISK

intiamaranto.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Small-to-mid ecommerce site for Intiamaranto selling amaranto-based food products. Contains product listings, contact phone/email, company address in Quito, newsletter subscription, cookie consent, and links to social channels. No signs of credential harvesting or financial investment schemes.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What intiamaranto.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Intiamaranto is a small-to-mid-sized ecommerce website presenting amaranto-based packaged foods, including snacks, chocolate products, and powdered amaranto, with online ordering and stated local points of sale. Its apparent business model is direct retail of natural food products rather than financial services or investment products.

Scam/Impersonation Risk

The site presents an ordinary food-retail proposition and the captured pages showed no credential-harvesting form, wallet-connect behavior, financial scheme, or apparent brand-impersonation pattern. However, this benign page presentation is outweighed by a confirmed blacklist condition and six malicious external detections, including flags from two Tier-1 security vendors. The result is a **material risk to sensitive interaction**, even though the available evidence does not establish that the website is impersonating a named brand or operating a phishing workflow.

EVIDENCE

- External reputation telemetry recorded 6 malicious detections and a confirmed blacklist condition from 2 blacklist sources.
- The homepage and account interface presented product retail content; no password form, hidden sensitive form, or external password submission was observed.
- WHOIS records show registration on 2021-07-23 with an age of 5.08 years; the historical record was first seen on 2013-07-18 and last seen on 2025-07-10, covering 13 years.

Regulatory Verification Notes

The business model appears to be food ecommerce, and the site provides product pages, “Nosotros,” “Contactos,” points-of-sale information, privacy and cookie materials, and social-channel links. No financial-service license is relevant to the stated business model, and no license claim or registration number is presented in the supplied site content. The legal and contact disclosures should therefore be treated as information supplied by the site rather than independently verified corporate identity evidence. The external broker-intelligence dataset recorded no matching broker signal, but that is contextual only and does not resolve the confirmed security-reputation issue.

EVIDENCE

- The Contact page and related site content identify a Quito business address and provide telephone, email, and WhatsApp contact channels.
- The site uses WordPress and WooCommerce with a newsletter form and contact/WhatsApp form; no sensitive financial or credential form was observed.
- Hosting resolves to AS31898, ORACLE-BMC-31898 – Oracle Corporation, US.
- The site's TLS certificate is DV, issued by YR2, and valid until 2026-10-23.

What to Verify Next

Before any transaction or account activity, an independent party should confirm that the Quito address, telephone number, business name, and points of sale correspond to a real operating food business. Any applicable food-business registration, seller authorization, return terms, delivery commitments, and payment-protection arrangements should be checked through authoritative or independently sourced channels rather than relying solely on the website. Contact details should also be validated through an offline or separately sourced route before exchanging sensitive information.

EVIDENCE

- The site's Contact and About content supplies the business address, contact channels, and points-of-sale information that require independent confirmation.
- The Shop and policy pages provide the appropriate locations for checking product, delivery, return, privacy, and payment terms before purchase.
- The site links to Facebook, Instagram, and WhatsApp, providing channels that can be cross-checked against independently located business profiles.

Summary Verdict

The overall posture is **critical trust risk**, driven by confirmed external threat-reputation contradictions rather than by the site’s stated food-retail model or observed page mechanics. The available evidence is insufficient to support sensitive interaction with the domain.

Infrastructure Integrity

The website is hosted directly on Oracle Corporation infrastructure in the United States, with no detected CDN or WAF layer and one resolved hosting address. The valid DV certificate provides transport encryption, but the hosting arrangement does not provide a sufficient trust basis or offset the external reputation findings.

Closing Assessment

Prospective users should limit activity to non-sensitive review and independently validate the business, transaction protections, and contact channels before considering any purchase, login, credential submission, or payment.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of intiamaranto.com.

- The request stayed on intiamaranto.com. It was not redirected to another domain. CLEAR
- Registration is published under ENOM, INC.. CLEAR
- DNS for this domain is served by bdiored.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-23. NOTED
- The earliest public archive of this site is from 2013-07-18. CLEAR
- It is hosted on ORACLE-BMC-31898, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about intiamaranto.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
