

Is investing.com legit? TrustSniffer's high-trust assessment: 90/100

investing.com

Verdict

90

OUT OF 100

HIGH TRUST

investing.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-07-08 by automated analysis. Classification confidence 45%.

What this site appears to be

An established financial news and market data page offering live quotes, indices, commodities, crypto data, analysis, tools (calendars, screeners) and broker reviews. Monetization is via ads, subscriptions and affiliate/referral relationships.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Investing.com is an established financial news and market-data portal presenting live prices, indices, commodities, cryptocurrency data, analysis, economic calendars, screeners, charts, and broker reviews. Its apparent business model combines advertising, paid subscriptions, and broker-referral partnerships.

Scam/Impersonation Risk

No contradictions were observed across the reviewed pages and technical signals. The homepage presents a coherent financial-news and market-data identity, with no phishing, impersonation, malicious-content, or blacklist indicators. Normal interaction, including account login and standard use, is appropriate.

- Homepage: professional financial-news and market-data presentation with substantial market, news, and analytical content.
- Homepage behavior: no hidden forms, wallet-drainer activity, cloaking, clipboard hijacking, or suspicious inline scripts.
- External reputation checks: no malicious or suspicious detections and zero abuse reports were recorded.

Regulatory Verification Notes

The site operates primarily as a financial-information and media service, monetized through advertising, premium subscriptions, broker referrals, and partnerships. The reviewed material does not present a specific financial-services license or registration number; this is a limited disclosure point for any regulated activity associated with referral partners, not evidence of deception. Registration is through GoDaddy.com, LLC, and the domain is long-established. The site's TLS certificate is valid and issued by the known issuer WE1.

- Domain registration: Registered 1995-02-23; approximately 31.46 years old; expiration 2030-02-24; registrar GoDaddy.com, LLC.
- Homepage: identifies market news, data, tools, analysis, and broker reviews as its core content.
- TLS certificate: DV validation, issuer WE1, valid to 2026-10-12.
- Broker-review and referral content: presents commercial partnerships as part of the site's monetization model.

What to Verify Next

For any regulated financial service reached through the site, confirm the provider's authorization directly with the relevant official registry and ensure the legal entity, jurisdiction, and service terms match the provider being

considered. Confirm official support and contact channels through the site's own legal or contact pages before resolving account or payment issues.

- Broker-review and referral pages: verify the regulatory status of each separately named provider.
- Legal and contact pages: confirm the responsible operating entity and applicable jurisdiction before entering a commercial arrangement.

Summary Verdict

Investing.com presents as a legitimate, established, and trustworthy financial-information website with a coherent business identity and clean technical and reputational posture. The evidence supports ordinary browsing, account access, and standard platform use.

Infrastructure Integrity

The site is protected by Cloudflare CDN and WAF infrastructure, with observed traffic served through CDN edge addresses rather than a directly exposed origin. This reduces direct infrastructure exposure and is a mitigating security factor, although protective hosting alone does not establish legitimacy.

- Hosting: served from AS13335, CLOUDFLARENET — Cloudflare, Inc., US.
- Observed edge IPs: 172.64.155.105 and 104.18.32.151.
- Infrastructure role: Cloudflare CDN/WAF protection was observed; the origin server address was not exposed.

Closing Assessment

Normal interaction is appropriate, with provider-specific licensing and legal-entity checks reserved for any regulated service or financial transaction reached through the platform.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of investing.com.

- The request stayed on investing.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)

- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2030-02-24. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about investing.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
