Full analysis

Overview

InvestorGain.com is an established financial-information and broker-comparison portal focused on Indian IPOs, grey-market premiums, subscription data, allotments, rights issues, non-convertible debentures, and investment education; it operates primarily through free editorial content and disclosed affiliate referrals for third-party demat accounts.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, impersonation signals, deceptive return guarantees, or other fraud patterns were observed. Its long-established domain, strong global traffic footprint, clean external reputation, and benign interaction testing collectively support the conclusion that the site is legitimate rather than a short-lived or deceptive operation.

- Domain-registration records show that the site was registered through GoDaddy.com, LLC in 2016 and is approximately 9.92 years old, with registration extending to 2030.
- Independent reputation telemetry recorded zero malicious and zero suspicious classifications, no safe-browsing alert, and no reported abuse against the assessed infrastructure.
- The homepage showed no sensitive or hidden forms, external password submission, suspicious inline scripts, cloaking, clipboard hijacking, or cryptocurrency-wallet interaction.
- The site holds global traffic rank 9,675, placing it within a well-established, high-traffic cohort.

Regulatory Verification Notes

The homepage presents InvestorGain as an informational publisher and comparison service, not as the executing stock broker or custodian. Its commercial model is transparently based on commissions from third-party account-opening referrals, supplemented by possible advertising and consultancy revenue. Investment-risk warnings accompany the IPO and grey-market-premium material, and no regulatory licence is claimed in the supplied content; this is consistent with the stated publishing model, although any separately contracted consultancy service should be assessed according to the precise activity offered.

- The homepage discloses affiliate commissions connected with visitors opening accounts through third-party broker links.
- The site's investment material warns that securities investing and grey-market-premium information involve risk.

- Homepage offers include advertised third-party pricing such as ₹0 account opening, ₹0 annual maintenance, ₹15 per order, and ₹20 futures-and-options trades.
- The site's transport encryption uses a DV certificate issued by WE1, valid until 2026-09-17.

What to Verify Next

Before opening an account, the named broker, pricing terms, and destination domain should be checked against the broker's official materials. Time-sensitive IPO, subscription, and grey-market-premium figures should be corroborated with authoritative issue documents or exchange sources before informing an investment decision. If consultancy services are engaged, the provider's contractual identity, scope, fees, and any applicable authorization should be confirmed in writing.

- The homepage routes visitors toward account-opening offers for named brokers including Zerodha, ProStocks, Upstox, 5paisa, and Angel One.
- The portal publishes live or time-sensitive IPO GMP, subscription, allotment, calendar, and performance-tracker information.
- The navigation advertises an SME consultancy service in addition to general research and comparison content.

Summary Verdict

InvestorGain.com is a legitimate, established, and trustworthy financial-information portal with no observed contradictory risk signals. The convergence of mature provenance, meaningful public usage, clean security reputation, transparent commercial content, and benign site behavior supports normal interaction, including account login and standard use.

Infrastructure Integrity

The site is protected by Cloudflare's CDN/WAF, with all observed addresses belonging to edge infrastructure; the origin server was therefore shielded from direct observation. This reduces direct infrastructure exposure but is treated as a security control rather than independent proof of legitimacy.

- The hosting infrastructure is served from AS13335 (CLOUDFLARENET — Cloudflare, Inc., US).
- Six observed addresses were Cloudflare edge endpoints, with no origin candidate exposed during the assessment.

Closing Assessment

Prospective users may interact with the site normally while applying ordinary financial due diligence before relying on published market information or accepting third-party commercial offers.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about investorgain.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
