

Is invidia.it legit? TrustSniffer's high-trust assessment: 100/100

invidia.it

Verdict

100

OUT OF 100

HIGH TRUST

invidia.it appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Official company site for Tecnojest Srl describing IoT/edge hardware, BMS, smart city solutions, lighting & energy offerings, contact details and office locations in Italy.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What invidea.it served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is an apparently corporate B2B website for Tecnojest Srl, presenting IoT gateways and fog devices, sensors, building-management systems, smart-city noise and environmental monitoring, lighting and energy systems, and Virtual Office Desk/UC services for industrial and municipal customers; its apparent model is solution sales, integration, and related software and services rather than consumer finance.

Scam/Impersonation Risk

No contradictions were observed across the site content, technical behavior, and external reputation checks. The website presents a coherent corporate technology profile, with no detected phishing, impersonation, malicious-content, or abuse pattern. Its pages did not expose a sensitive login form, payment form, wallet connection, or untrusted submission destination, and the observed browser behavior showed no suspicious external activity. The apparent association with Tecnojest Srl is supported by the site's corporate presentation and matching registrant organization, although the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- The homepage identifies the business as “Tecnojest srl” and presents corporate IoT and smart-city use cases without detected deception indicators.
- The site’s observed behavior recorded 0 external XHR requests, 0 external POST requests, 0 hidden forms, and 0 wallet-provider or wallet-drainer runs across 2 successful runs.
- The domain was registered in 2001 (~24.82 years old), according to the domain registration record.
- Historical records span 2003–2026, covering 24 years; the available historical record contains 129 snapshots.

Regulatory Verification Notes

The available pages describe a conventional industrial technology provider rather than a financial or investment service. The site identifies Tecnojest Srl, provides contact details and Italian office-location information, and links to corporate social channels. No licensing claim or license number is presented; this is a regulatory-transparency item to validate if a proposed engagement involves a regulated activity, but it is not evidence of a scam. External reputation checks found no malicious or suspicious detections, and no broker-related match was identified. The site’s lower page-authority signal and limited search-optimization metadata are quality limitations rather than legitimacy contradictions.

EVIDENCE

- The homepage and corporate navigation identify “Tecnojest srl” and provide About Us, Contact Us, Downloads, and News pages.
- The domain registration record lists Aruba s.p.a. as registrar and TecnoJest S.r.l. as the registrant organization.
- The site is served from AS51167 (CONTABO - Contabo GmbH, DE).
- The transport certificate is DV-validated, issued by YR1, and valid to 2026-11-08.

What to Verify Next

Before credential or payment interactions, an enterprise should independently confirm the TecnoJest S.r.l. legal identity and relevant Italian corporate-registration details, obtain applicable service terms and commercial documentation, and confirm that the published contact channels reach the intended business through an independently sourced route. Any proposed transaction should use payment protections appropriate to the contract value and should be matched against a formal quotation, purchase order, or signed agreement.

EVIDENCE

- The site provides dedicated About Us and Contact Us pages that can be compared with independently sourced company records.
- The navigation includes Downloads and News sections, which can support validation of product documentation and continuity of business activity.
- YouTube and LinkedIn are linked as external corporate channels and can be checked independently for consistency of branding and business activity.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate corporate website and supports a high-trust, low-risk posture. The classification is strong, while independent confirmation of the real-world operator remains incomplete; ordinary business-identity and payment-protection checks therefore remain appropriate before sensitive engagement.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, with observed edge infrastructure on AS16509 operated by Amazon.com, Inc. in the United States; the origin server was not observable in this analysis. This reduces direct exposure of the origin and is a mitigating infrastructure signal, although CDN/WAF protection alone does not establish legitimacy.

Closing Assessment

The site is suitable for ordinary business evaluation, provided formal identity, contractual, and payment controls are completed before credentials or funds are exchanged.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of invidea.it.

- The request stayed on invidea.it. It was not redirected to another domain. CLEAR
- Registration is published under Aruba s.p.a.. CLEAR
- DNS for this domain is served by o2ip.cloud. NOTED
- The registration is paid up to 2026-10-06. NOTED
- The earliest public archive of this site is from 2003-01-24. CLEAR
- It is hosted on CONTABO, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about invidea.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
