

Is inyatsi.co.zm a scam? TrustSniffer's high-risk assessment: 0/100

inyatsi.co.zm

Verdict

0

OUT OF 100

CRITICAL RISK

inyatsi.co.zm shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Simple auto-generated Apache/nginx-style directory index listing files and a cgi-bin; no forms, offers, or identifiable business model.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	12 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR
Abuse reports on the host	0 reports AbuseIPDB; shared hosting inflates this count	NOTED
Domain age	13 years old Registered history	CLEAR
Web archive	Archived since 2021 Public history exists	CLEAR
Certificate	Encrypted connection Issued by YR2	NOTED

What inyatsi.co.zm served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is a bare server directory titled “Index of /,” exposing a cgi-bin entry rather than presenting an identifiable company, product, or customer-facing service; its apparent function is technical file hosting, not a clearly defined commercial or institutional website.

Scam/Impersonation Risk

Confirmed external blacklist coverage and multiple malicious detections create a serious risk for sensitive interaction, despite the absence of an on-page login form, payment flow, or explicit brand-impersonation content. The homepage offers too little context to establish a legitimate operating purpose, and the available evidence does not independently verify the real-world operator. No identity contradiction was observed, but the confirmed blacklist and malicious detections are sufficient to warrant treating credentials, financial activity, and other sensitive interactions as inappropriate.

EVIDENCE

- External reputation checks recorded 12 malicious detections, including a Tier-1 detection from Sophos.
- The domain was flagged by both VirusTotal and an external blacklist source; Google Safe Browsing did not flag it.
- Registration records show creation on 2013-03-14, with an age of 13.44 years.
- Archive coverage records 9 snapshots spanning 2021–2024, with 4 years tracked.

Regulatory Verification Notes

The site does not present a discernible regulated service, legal entity, licensing claim, registration number, or governing authority. This is a material disclosure gap for any prospective financial, payment, investment, or other regulated use, while operator identity remains unverified rather than established by the available material. The absence of a broker-dataset match provides no positive regulatory assurance and should not be treated as a licensing determination.

EVIDENCE

- The homepage contains only a directory index and does not identify a company, service terms, license, or registration number.
- The domain registrar is AfriConnect Zambia.
- The site's TLS certificate is issued by YR2 at DV validation level and is valid to 2026-11-14 12:38:53 UTC.

What to Verify Next

Before any engagement, an independent registry search should confirm the responsible legal entity and any authorization required for the intended activity. Contact channels and ownership claims should be corroborated through an independently sourced, offline or otherwise trusted route, and any files exposed through the directory should be assessed separately before download or execution. No credentials, payment details, wallet authorizations, or confidential information should be submitted while those checks remain unresolved.

EVIDENCE

- The homepage exposes no forms, login mechanism, or sensitive-data collection point.
- Two monitored page runs completed successfully with no external requests, external form submissions, wallet activity, clipboard writes, or hidden forms.
- The only visible internal navigation target is the cgi-bin directory entry.

Summary Verdict

The overall posture is **critical risk**, with the site unsuitable for sensitive interaction and lacking sufficient evidence to support a legitimate institutional or commercial identity. The apparent technical stability of the page does not overcome the external threat and blacklist findings.

Infrastructure Integrity

The site resolves directly to infrastructure operated by AfriConnect Zambia Ltd in Zambia, with no CDN or WAF detected and a directly visible origin address. This provides limited protective separation between the website and its hosting environment; infrastructure identification is a technical observation, not evidence of legitimacy.

EVIDENCE

- Hosted on AS36959, AfriConnect Zambia Ltd - AfriConnect Zambia Ltd, ZM; resolved address 196.12.12.102.
- The infrastructure record reports 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- The hosting registry is AFRINIC and the infrastructure country is ZM.

Closing Assessment

Sensitive interaction should be withheld, and any future engagement should proceed only after independent confirmation of the responsible entity, authorization, and technical safety of the exposed content.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of inyatsi.co.zm.

- The request stayed on inyatsi.co.zm. It was not redirected to another domain. CLEAR
- Registration is published under AfriConnect Zambia. CLEAR
- DNS for this domain is served by iconnect.zm, across 2 name servers. NOTED
- The registration is paid up to 2026-04-14. NOTED
- The earliest public archive of this site is from 2021-12-07. CLEAR
- It is hosted on AfriConnect Zambia Ltd, from a server in ZM. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about inyatsi.co.zm at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
