What iodonna.it served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an Italian women's lifestyle and news magazine presenting editorial coverage of fashion, beauty, travel, culture, and current affairs under the iO Donna brand associated on the page with Corriere della Sera. Its apparent business model combines advertising, personalized advertising subject to consent controls, and paid subscriptions that remove advertising or unlock content.

Scam/Impersonation Risk

No contradictions were observed: the available evidence contains no confirmed phishing, impersonation, malicious-reputation, or blacklist indicators. The homepage's login and subscription functions are consistent with the stated magazine business model, and testing found no hidden forms, externally submitted password forms, wallet connections, clipboard manipulation, or cloaking. Automated interaction did observe some non-whitelisted external requests and posts, but this did not converge with deceptive page behavior or a brand-impersonation signal. The site therefore presents an apparently legitimate, low-risk interaction surface, while the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage identifies the publication as “iO Donna: il femminile del Corriere della Sera” and presents editorial content rather than deceptive investment or financial-service offers.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no blacklist or phishing finding; the domain’s traffic rank was 17288 and it was within the top 1 million.
- Domain registration evidence: registered 1999-07-16; age 27.11 years; registrar Tuonome Registrar S.r.l.

Regulatory Verification Notes

The site’s content supports an established editorial and subscription operation, not a business model that ordinarily depends on financial-services licensing. The supplied page material does not present a regulatory license or license number, so licensing is not independently established from the site and should be treated as a limited disclosure point rather than evidence of wrongdoing. The page does identify the iO Donna and Corriere della Sera relationship, while registration records associate the domain with Rapagna Alceo and RCS Mediagroup S.p.A.; these records are relevant identity signals but do not independently prove the real-world operator relationship. Cookie and consent controls are visibly provided for personalized advertising and content processing.

EVIDENCE

- The homepage displays subscription choices, including an annual paid-access option, alongside login and consent-management controls.
- The observed serving layer used AS54113 (FASTLY - Fastly, Inc., US).
- The site’s TLS certificate is issued by Certainly Intermediate R1, uses Domain Validation (DV), and is valid to 2026-09-01T06:37:54+00:00.
- Registration records list owner Rapagna Alceo and organization RCS Mediagroup S.p.A.

What to Verify Next

Before credential or payment interactions, an enterprise or consumer should independently confirm that the subscription merchant identity, billing entity, renewal terms, cancellation process, and refund or return conditions correspond to the expected publisher. Official contact channels should be confirmed through an independently sourced route, and payment should use a method providing appropriate dispute or payment-protection rights.

EVIDENCE

- The homepage presents both account access and subscription purchase functions, making merchant and renewal-term confirmation directly relevant.
- The consent interface links the site’s advertising and content-processing choices to its stated cookie policy and offers preference controls.
- The supplied page content does not independently establish a license or regulated-service status; any such requirement should be checked against the applicable registry for the specific transaction.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website with no observed scam or impersonation contradiction. This conclusion supports ordinary site use, but it does not constitute independent proof of the real-world operator’s identity.

Infrastructure Integrity

Infrastructure resolution identifies RCS MediaGroup S.p.A. in Italy, on AS202095, with one resolved address and no separately detected CDN or WAF edge layer. The observed serving-layer telemetry separately identifies Fastly in the United States; these are infrastructure observations and provide operational context, but protective or intermediary hosting should be treated only as a mitigating control, not as proof of legitimacy.

Closing Assessment

Proceed with ordinary use after completing the independent merchant-identity, subscription-terms, and payment-protection checks appropriate to the intended interaction.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of iodonna.it.

- The request stayed on iodonna.it. It was not redirected to another domain. CLEAR
- Registration is published under Tuonome Registrar S.r.l.. CLEAR
- DNS for this domain is served by tuonomeregistrar.net. NOTED
- The registration is paid up to 2026-10-20. NOTED
- It is hosted on FASTLY, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about iodonna.it at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
