Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Iolatam is an informational corporate website presenting itself as a Lima-based Peruvian IT services and solutions provider. It offers outsourcing, IT infrastructure, networking and connectivity, helpdesk support, hardware and supplies, and consultancy to small and medium-sized businesses and home users, with contact calls to action for prospective customers.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent corporate-services model rather than financial solicitation, credential harvesting, or crypto-related activity; available external checks found no malicious or blacklist indicators, and the observed browsing behavior showed no login form, sensitive form, wallet activity, cloaking, or suspicious external network activity. The apparent business identity is supported by a long-established registration record and continuous historical presence, although the operator's real-world identity remains independently unverified. The homepage's claims of satisfied clients, projects, products, and support activity are marketing assertions rather than independently validated customer references.

EVIDENCE

- The homepage describes lolatam as a Lima-based Peruvian IT company serving businesses and households, with no impersonation indicators or financial solicitation.
- The domain registration record shows registration on 2016-03-23, approximately 10.42 years old, through PDR Ltd. d/b/a PublicDomainRegistry.com.
- Historical archive records span 2017-04-01 to 2025-07-12, covering 9 years; the available capture is sparse but does not indicate suspicious repurposing or semantic drift.
- The observed homepage behavior recorded no login form, sensitive form, wallet connection, clipboard manipulation, cloaking, or external XHR activity.

Regulatory Verification Notes

The legal and business presentation is consistent with an IT-services provider, and the homepage identifies the business as Peruvian and based in Lima. No licensing claim or license number is presented; for ordinary IT outsourcing and consultancy this is primarily a disclosure and applicability question, while any hardware sales or specialized services should be assessed against the requirements of the relevant jurisdiction. The available third-party reputational context contains no matched broker record and should be treated only as contextual support, not as evidence of legal registration. Transport security is present, but a domain-validated certificate confirms control of the web domain rather than the legal identity of the operator.

EVIDENCE

- The homepage lists outsourcing, infrastructure, networking, helpdesk, supplies and laptop sales, and IT consultancy as the offered services.
- The site's hosting infrastructure is served from AS13335, Cloudflare, Inc. / CLOUDFLARENET, United States.
- The site uses a DV TLS certificate issued by WE1, valid to 2026-10-18.
- The homepage identifies lolatam as a Lima-based Peruvian company but does not display a licensing claim or license number.

What to Verify Next

Before a credential or payment interaction, an intending customer should independently confirm the contracting entity through an applicable Peruvian corporate or commercial registry, establish that the quoted services and hardware are supplied by that entity, and review written terms covering scope, refunds, delivery, warranty, and payment protection. Any service requiring sector-specific authorization should be matched to the relevant regulator's current registry rather than inferred from the website's presentation. Official contact channels should also be confirmed through an independent route before a material transaction.

EVIDENCE

- The homepage provides a general contact call to action but does not itself establish an independently verified contracting relationship.
- The homepage presents hardware and supplies alongside consultancy and managed IT services, making written commercial, delivery, and warranty terms relevant to any purchase.
- The site's stated customer, project, product, and support counters are presented as promotional metrics without supporting records on the reviewed page.

Summary Verdict

The overall posture is high trust and low risk, and the available evidence is consistent with an established, apparently legitimate corporate website. This conclusion does not independently prove the real-world identity of the operator, so legitimacy should be understood as evidence-consistent rather than conclusively verified.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, with observed edge service associated with Cloudflare's US network. This is a mitigating security and availability measure, not proof of business legitimacy; the infrastructure appears resolved and consistent with standard CDN deployment.

EVIDENCE

- Cloudflare CDN/WAF protection is present on the site.
- Observed edge infrastructure includes 104.21.6.114 and 172.67.134.195, both associated with AS13335.
- The infrastructure record identifies Cloudflare, Inc. as the hosting provider and ARIN as the registry.

Closing Assessment

Routine informational browsing is proportionate to the assessed posture; before submitting credentials or making a payment, independent merchant-identity, contractual, return-policy, and payment-protection checks should be completed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of iolatam.com.

- The request stayed on iolatam.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-03-23. NOTED
- The earliest public archive of this site is from 2017-04-01. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about iolatam.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
