

Is ionos.co.uk safe? TrustSniffer's moderate-trust assessment: 65/100

ionos.co.uk

Verdict

65

OUT OF 100

MODERATE TRUST

ionos.co.uk is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Safe for Read-Only

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Official IONOS UK marketing and product page describing domains, hosting, cloud services, AI offerings and pricing; contact numbers and service guarantees present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What ionos.co.uk served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Safe for Read-Only.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

IONOS UK is a corporate web-services website presenting domains, hosting, cloud infrastructure, servers, email and office services, SSL products, and AI-enabled tools, with a subscription and enterprise-services business model aimed at helping individuals and organisations establish and operate online.

Scam/Impersonation Risk

No phishing, malicious-content, impersonation, or identity-contradiction indicators were observed. The homepage is service-focused, provides conventional corporate navigation and contact pathways, and does not present a wallet connection, hidden credential form, or other abuse-oriented interaction. The available evidence therefore supports a moderate, non-contradictory risk posture, while the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage is categorised as a corporate/service page and contains no login form, hidden sensitive form, or untrusted form destination.
- External reputation checks recorded 0 malicious and 0 suspicious detections, with no phishing or blacklist finding recorded for the assessed site.
- The site appears within the global top 1 million by traffic, with a recorded rank of 16295.

Regulatory Verification Notes

The site's stated activities are commercial technology and infrastructure services rather than a financial-services offering, and no financial-services licence or registration number is claimed in the available material. The available pages provide product and pricing information, contact numbers, support access, and service guarantees, but the legal and governance material does not independently verify the real-world operator behind the site. This is a transparency and identity-verification gap rather than evidence of a scam. No matching third-party broker-reputation record was identified, although that absence is contextual only and is not a licensing determination.

EVIDENCE

- The homepage describes domains, web hosting, cloud and server infrastructure, managed services, SSL products, and AI offerings.
- The homepage displays support and contact routes, including telephone contact and access to an "About Us" section.
- The site is served through AS8560, IONOS-AS - IONOS SE, DE.
- The site's TLS certificate is issued by Sectigo Public Server Authentication CA OV R36, uses OV validation, and is valid to 2026-09-28T23:59:59+00:00.

What to Verify Next

Before sensitive account, contractual, or payment activity, an independent check should confirm the contracting legal entity, applicable terms, cancellation and refund provisions, and the appropriate business registry details. Where a service involves regulated activity or customer funds, the relevant regulator's register should be checked independently. Contact details should also be confirmed through an independently sourced corporate channel rather than relying solely on the website.

EVIDENCE

- The homepage provides separate "About Us," "Support," and "Sign In" pathways that can be used to compare identity and service information.
- The homepage presents product packages and pricing cues, making it possible to reconcile advertised services with the applicable terms before purchase.
- The assessed page completed successfully in two behavioural runs, with no detected wallet, clipboard-hijacking, cloaking, or hidden-form activity.

Summary Verdict

The website has a **moderate-trust posture**: its corporate presentation, coherent service model, clean technical and reputation signals, and absence of contradictions support ordinary read-only assessment. Because independent operator identity and governance confidence are limited, the evidence does not establish identity as verified and does not support treating the site as suitable for high-value sensitive activity without additional checks.

Infrastructure Integrity

The site uses a CDN/WAF layer, and all observed addresses were edge servers with no origin candidate identified in the analysis. This limits direct exposure of the underlying service and is a mitigating infrastructure characteristic, but it is not proof of legitimacy or operator identity.

Closing Assessment

Ordinary browsing and read-only use are proportionate to the evidence; sensitive account, contractual, or payment actions should follow independent identity, terms, and regulatory checks and use available payment protections.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ionos.co.uk.

- The request stayed on ionos.co.uk. It was not redirected to another domain. CLEAR
- It is hosted on IONOS-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ionos.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
