- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established New Zealand cloud-payroll service that presents payroll processing, Inland Revenue payday filing, employee self-service, leave and HR-record management, reporting, banking workflows, and software integrations for businesses and professional-service partners.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, malicious reputation findings, or suspicious browser behaviours were observed. The domain's long registration history and extensive, continuous archival record strongly support provenance, while the homepage presents a coherent commercial identity and mature service offering.

- Domain-registration records show registration through Dreamscape Networks International Pte Ltd t/a Crazy Domains on 28 December 2000, making the domain approximately 25.61 years old.
- The web archive contains 339 snapshots from 4 November 2001 through 1 July 2026, covering 26 tracked years with no suspicious repurposing or semantic drift identified.
- External threat-reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, no abuse reports, and no matching threat signatures.
- The homepage displayed no hidden forms, cloaking, suspicious inline scripts, clipboard interference, wallet-related behaviour, or untrusted form destination.

Regulatory Verification Notes

The homepage describes payroll functionality aligned with New Zealand business operations, including PAYE and Inland Revenue payday filing, and states that the service has a proven compliance track record. It also advertises ISO/IEC 27001:2022 security information and provides navigation to company, team, privacy, support, and data-protection material. The supplied page evidence does not establish a specific legal-entity registration or independently verified certification or regulatory status; this is a limited disclosure-verification point, not evidence of deception.

- The homepage states that its payday-filing solution complies with Inland Revenue requirements and provides dedicated security and privacy resources.
- The homepage publishes an ISO/IEC 27001:2022 security claim, but the supplied content does not include the certificate particulars needed for independent confirmation.
- The site is served from AS16509 (Amazon.com, Inc., US).

- Transport encryption uses a DV certificate issued by Amazon RSA 2048 M04, valid until 17 December 2026.

What to Verify Next

Enterprise onboarding should include confirming the contracting legal entity and its New Zealand registration details, obtaining the referenced ISO/IEC 27001:2022 certificate and scope statement, and reviewing the privacy and security terms for payroll-data location, retention, incident notification, subprocessors, access controls, and recovery arrangements. Banking and Inland Revenue workflow permissions should also be tested within the prospective customer’s own control framework.

- The homepage provides paths to company, team, privacy, security, support, and developer information suitable for formal due diligence.
- The advertised integrations include Xero, goRoster, MyHR, Subscribe-HR, Timecloud, TimeFiler, enableHR, iDt Group, BundyPlus, Simplifi, Timble, and CleverTime, creating interfaces that should be included in access and data-flow review.
- The service includes user roles, banking and Inland Revenue payments, employee records, and document management, making permission design and data-handling controls relevant to onboarding.

Summary Verdict

The website is legitimate, established, and trustworthy. Its identity, operating history, coherent business presentation, clean external reputation, and benign observed behaviour converge on a high-confidence assessment with no contradictory risk signals.

Infrastructure Integrity

The service operates on mainstream Amazon infrastructure with valid transport encryption. This reduces direct infrastructure and in-transit exposure, although such technical protections are supporting controls rather than independent proof of business legitimacy.

Closing Assessment

Normal interaction, including account login and standard use, is appropriate; regulated organizations may proceed through their customary supplier-security and contracting controls.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ipayroll.co.nz.

- The request stayed on ipayroll.co.nz. It was not redirected to another domain. CLEAR
- Registration is published under Dreamscape Networks International Pte Ltd t/a Crazy Domains. CLEAR
- DNS for this domain is served by awsdns-55.org, across 4 name servers. NOTED
- The earliest public archive of this site is from 2001-11-04. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ipayroll.co.nz at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
