Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

IP Exchange is an Australian business telecommunications and IT services provider presenting high-speed connectivity, IP transit, fiber, colocation, voice, media, wholesale, and network-design solutions for business customers.

Scam/Impersonation Risk

No scam, phishing, impersonation, or identity contradictions are observed. The homepage presents a coherent corporate service model, identifies a company history dating to 2004, and provides business-oriented service descriptions rather than financial manipulation or deceptive interaction patterns. Normal interaction with the site is appropriate.

- External reputation checks recorded zero malicious detections, zero suspicious detections, and zero abuse reports.
- The homepage contains no login form, sensitive form, hidden form, wallet connection, or suspicious script behavior.
- Domain history indicates registration in 2007 and an age of approximately 18.6 years.
- Historical coverage contains 190 archive snapshots spanning 2007–2026, with 20 years tracked.

Regulatory Verification Notes

The About and Contact content presents an established telecommunications business with a physical address, telephone contact information, partner references, and a clearly defined B2B service model. The pages do not present a specific regulatory licence or registration number; this is a transparency item for ordinary procurement verification, not evidence of illegitimacy. Registration is associated with Melbourne IT and FIBRE BROADBAND PTY LTD.

- The homepage identifies IP transit, fiber connectivity, colocation, voice, media, wholesale, and network-design services.
- The About and Contact pages provide company-history, address, and telephone information.
- Served from AS4857, TVP-OPERATIONS-COMPANY-AP – TVP Operations Company, AU.
- TLS certificate issued by YR2 with DV validation, valid to 2026-10-19.

What to Verify Next

Before entering a material service agreement, the contracting entity and any applicable Australian telecommunications obligations should be confirmed through the relevant corporate or regulatory records. Standard procurement checks should also confirm the commercial scope, service levels, and authorized business contacts.

- The service pages define the offered connectivity, network, voice, media, and wholesale capabilities.
- The About and Contact pages provide the business identity and contact channels needed for independent confirmation.

Summary Verdict

The website presents as a legitimate, established, high-trust corporate service provider with a coherent identity and no observed contradictory risk signals. Normal interaction, including account login where offered and standard use, is appropriate.

Infrastructure Integrity

The supplied infrastructure evidence does not establish a separate CDN, WAF, or origin-concealment posture. Infrastructure is therefore treated as technical context and not as independent proof of legitimacy.

Closing Assessment

Normal business engagement may proceed through standard commercial and procurement controls appropriate to the value and scope of the proposed service.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ipexchange.com.au.

- The request stayed on ipexchange.com.au. It was not redirected to another domain. CLEAR
- Registration is published under Melbourne IT. CLEAR
- DNS for this domain is served by com.au, across 3 name servers. NOTED
- The earliest public archive of this site is from 2007-12-23. CLEAR
- It is hosted on TVP-OPERATIONS-COMPANY-AP, from a server in AU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ipexchange.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
