

Is iptvsmartersofficiel.com a scam? TrustSniffer's high-risk assessment: 0/100

iptvsmartersofficiel.com

Verdict

0

OUT OF 100

CRITICAL RISK

iptvsmartersofficiel.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be	Commercial site selling IPTV subscription plans (Starter, Confort, Premium, Pack 2 Codes) with claims of 115k+ channels, 120k+ VOD, immediate activation and 30-day refunds. Accepts card, PayPal and crypto; offers support via WhatsApp. Limited verifiable business identity or regulatory evidence provided.
------------------------------	--

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What iptvsmartersofficiel.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2025.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Kaspersky flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

What the site presents is a commercial IPTV subscription storefront branded as “IPTV Smarters Pro,” offering time-limited access packages for French and international television channels, films, sports, and video-on-demand content, with activation following payment.

Scam/Impersonation Risk

The site has a **confirmed blacklist signal**, with external threat detections materially outweighing the ordinary positive indicators of a functioning website. The homepage promotes Starter, Confort, Premium, and Pack 2 Codes subscriptions, claiming more than 115,000 channels, 120,000 films and series, 99.9% availability, immediate activation, and 30-day refunds. Payment is accepted by card, PayPal, and cryptocurrency before service delivery, while support is routed through WhatsApp. These claims and payment mechanics create a meaningful claim-evidence and transaction-risk concern, particularly because the site provides limited independently verifiable business context. No separate identity contradiction or brand-impersonation finding was

identified, but the blacklist and threat-detection evidence is sufficient to make sensitive interaction inappropriate. Evidence:

- The homepage lists IPTV subscription packages with immediate activation after payment and multi-code purchases.
- The homepage claims “115 000+” channels, “120 000+” films and series, “99.9%” availability, and a “4.9★” customer rating.
- External threat intelligence recorded 6 malicious and 1 suspicious detections for the domain.
- The domain is recorded as blacklisted by two external sources.

Regulatory Verification Notes

The available site content does not establish a verifiable operating entity, broadcast-rights holder, or licensing position. The commercial pages present the service as official and stable, but those on-site descriptions do not independently verify the operator or its rights to provide the advertised programming. This is a substantive regulatory and disclosure gap for a paid television-content service, separate from the confirmed external reputation issue. The domain’s registration is privacy-protected through Namecheap, which is an administrative registration detail rather than proof of wrongdoing. Evidence:

- The homepage and subscription pages provide product and payment information but limited verifiable business identity or regulatory context.
- The site does not present a verifiable license number or licensing authority for the advertised television content.
- Registered 2022; domain age 4.62 years.
- Hosted on AS47583 (AS-HOSTINGER – Hostinger International Limited, CY); TLS certificate issued by YE2 with DV validation, valid to 2026-11-03.

What to Verify Next

Before any transaction, an independent check should confirm the legal entity operating the service, its entitlement to distribute the named channels and content, and the enforceability of the stated refund terms. Payment-protection terms should be checked directly with the card or PayPal provider, and official support channels should be confirmed through an independent route rather than relying solely on contact details presented on the site. No credentials or payment details should be submitted while those checks remain unresolved. Evidence:

- The subscription flow requires payment before access is activated.
- The homepage advertises a 30-day refund policy that should be validated against the written terms and payment-provider protections.
- The site offers card, PayPal, and cryptocurrency payment methods, creating different recovery and dispute options that should be assessed separately.
- The site uses a single purchase/contact form and a WhatsApp support widget.

Summary Verdict

The overall posture is **critical trust risk**. The site’s commercial presentation and functioning transport security do not offset the confirmed external reputation contradictions, limited operator verification, and transaction model that requires payment before service. Sensitive interaction, credential submission, and financial engagement are not supported by the available evidence.

Infrastructure Integrity

The site resolves directly to infrastructure associated with Hostinger International Limited, with no detected CDN or WAF edge layer and four IP addresses assessed as likely origin candidates. This provides a technically identifiable hosting path but offers no legitimacy assurance and does not mitigate the external reputation concern.

Closing Assessment

Prospective users should restrict activity to non-interactive observation and should not log in, provide credentials, or make payments unless independent legal, service-rights, and payment-protection checks produce satisfactory results.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01

Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02

Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of iptvsmartersofficiel.com.

- The request stayed on iptvsmartersofficiel.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by dns-parking.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-06. NOTED
- The earliest public archive of this site is from 2025-07-12. CLEAR
- It is hosted on AS-HOSTINGER, from a server in UA. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about iptvsmartersofficiel.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
