

Is iscml-split.com safe? TrustSniffer's moderate-trust assessment: 50/100

iscml-split.com

Verdict

50
OUT OF 100

MODERATE TRUST

iscml-split.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Sensitive Interaction Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Official conference site for the 6th International Scientific Conference on Maritime Law (ISCML Split 2027). Contains event dates, venue, organizers, keynote speakers, registration and travel/hotel information.

Evidence status and limitations

Evidence completeness: **UNKNOWN**

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website presents itself as the official online presence for the sixth International Scientific Conference on Maritime Law in Split, offering event information, academic programme details, speaker and committee information, registration arrangements, and practical travel and accommodation guidance for prospective attendees.

Scam/Impersonation Risk

Contradictory external reputation signals materially change the risk posture despite the site's coherent conference presentation. The domain has been confirmed on blacklist data and has multiple malicious detections, creating a significant concern for sensitive interactions such as registration payments or submission of personal information. The site's visible content does not show a login form, credential-harvesting mechanism, financial solicitation, or apparent brand impersonation, so the available evidence does not establish that the conference content itself is fraudulent; however, the external detections cannot be discounted. No suspicious contact-email anomaly was identified.

EVIDENCE

- The homepage presents the event as the “6th International Scientific Conference on Maritime Law,” with dates of 28 April–1 May 2027 and Split as the venue location.
- External reputation assessment recorded 3 malicious and 1 suspicious detections, with a confirmed blacklist status.
- The homepage and registration-related content showed no password form, hidden sensitive form, wallet connection, or untrusted form destination.

Regulatory Verification Notes

The site appears informational and conference-oriented, with organizing, honorary, and programme committees described across its event pages. Its apparent funding model involves registration fees, sponsorship, and partner or co-organizer support rather than a regulated financial service. No regulatory licence or licence number is claimed, and the available evidence does not independently verify the legal entity operating the event; this is a verification limitation rather than proof of misconduct. The registration and accommodation arrangements therefore warrant confirmation through the named institutions, venue, and payment counterparties before funds or personal data are provided.

EVIDENCE

- The “About us,” “Organizing committee,” “Honorary Committee,” and “Program Committee” pages describe the event’s organizational structure.
- The registration and travel pages provide attendee-registration and hotel-related information but do not present a regulatory licence or licence number.
- The domain was registered in 2019 and is approximately 6.79 years old through PDR Ltd. d/b/a PublicDomainRegistry.com.
- The site’s transport encryption uses a DV certificate issued by YR2, valid until 2026-11-06 11:54:57 UTC.

What to Verify Next

The event’s organizers should be matched independently against the official websites of the referenced academic or professional institutions, and the conference venue should confirm the event directly through an independently sourced contact route. Any registration payment should be directed only to a beneficiary whose legal name and relationship to the event are confirmed by those institutions, with payment protection retained where available. Registration, cancellation, refund, and accommodation terms should be reviewed before commitment, and official support channels should be confirmed through an independent offline route.

EVIDENCE

- The event pages identify an organizing structure, programme, venue, registration process, and accommodation information that can be cross-checked independently.
- The site’s page analysis classified the content as an informational conference website and found no sensitive form or untrusted submission destination.
- The site contains no independently verified regulatory-registration reference for the event operator.

Summary Verdict

The website has a coherent, apparently legitimate conference presentation, but its overall posture is **moderate trust with elevated sensitive-interaction risk**. Confirmed external reputation contradictions prevent the site from being treated as sufficiently trustworthy for unverified payment or personal-data transactions, and the real-world operator identity remains unverified.

Infrastructure Integrity

The site resolves directly to a single hosting endpoint and has no detected CDN or WAF layer. Hosting is provided through AS201563, AVALON-AS - cyber_Folks d.o.o. in Croatia; this is a concrete infrastructure fact, not an assurance of legitimacy, and the absence of an independent protective edge limits the mitigating value of the hosting arrangement.

Closing Assessment

A prospective attendee should use independently confirmed institutional and venue channels before completing registration, submitting personal information, or making payment.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine.

- 01 Sensitive Interaction Risk
- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of iscml-split.com.

- The request stayed on iscml-split.com. It was not redirected to another domain. CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. CLEAR
- DNS for this domain is served by cdn.hr, across 2 name servers. NOTED
- The registration is paid up to 2026-11-05. NOTED
- The earliest public archive of this site is from 2021-12-09. CLEAR
- It is hosted on AVALON-AS, from a server in HR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about iscml-split.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
