

Is iskenderunelektrikci.com legit? TrustSniffer's high-trust assessment: 100/100

iskenderunelektrikci.com

Verdict

100

OUT OF 100

HIGH TRUST

iskenderunelektrikci.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Turkish-language local electrician service page for İskenderun, listing contact phone numbers and services (electric repairs, shofben repair, plumbing tags). Appears to be a straightforward service listing without forms or financial deposit flows.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

İskenderun Elektrikçi

What iskenderunelektrikci.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

What this website is

A Turkish-language local service listing for an electrician and tradesperson serving İskenderun and surrounding areas, presenting 24/7 electrical repair, installation, water-heater servicing, and plumbing-related work arranged through published telephone contacts and paid service calls.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent local-services model rather than an investment, deposit, credential-harvesting, or wallet-connection flow: it describes electrical repairs, water-heater installation and repair, and plumbing services, while providing telephone contact details. The page has no login or sensitive-input form, no hidden forms, no external posting activity, and no detected brand-impersonation indicators. External reputation observations were also clean, with no malicious or suspicious detections recorded; this supports a low scam and impersonation risk assessment, although it does not independently establish the operator's real-world identity.

EVIDENCE

- Homepage: Turkish-language description of İskenderun electrical, water-heater, and plumbing services, with no financial solicitation.
- Homepage and page behavior: 0 login forms, 0 hidden forms, 0 external XHR requests, and 0 wallet-connection runs across 2 successful runs.
- External reputation observations: 0 malicious detections, 0 suspicious detections, 0 abuse reports, and no blacklist hit recorded.
- Homepage: Brand-impersonation analysis returned “no_brand_impersonation_detected.”

Regulatory Verification Notes

The site appears consistent with an established local tradesperson listing, but the available evidence does not independently verify the individuals or business entity named on the page. The page names Ekrem Öztürk and Mahmut Öztürk and publishes service telephone numbers, yet it does not state a license authority or license number. For ordinary electrical and plumbing work, this is a transparency and authorization-check point rather than evidence of scam activity. No separate broker-reputational match was identified. The domain’s registration continuity, valid transport encryption, and stable mainstream hosting provide affirmative support for an established online presence, while the site’s limited metadata and lack of structured business markup reduce formal presentation quality without creating a contradiction.

EVIDENCE

- Domain registration records: created 2017-07-07T08:29:15Z, approximately 9.13 years old, registered through Isimtescil Bilisim A.S., expiring 2027-07-07T08:29:15Z.
- Historical capture records: 31 snapshots spanning 2018–2025, with 8 years tracked; coverage is sparse.
- Hosting infrastructure: served from AS13335, CLOUDFLARENET—Cloudflare, Inc., US.
- Transport encryption: TLS certificate issued by WE1 at DV validation level, valid to 2026-11-10T01:03:30+00:00.

What to Verify Next

Before a commercial engagement, the prospective customer should confirm that the named tradesperson or business is the party accepting the booking, obtain a written scope and price, and establish whether the work requires locally applicable qualifications or permits. Payment should use a method offering an appropriate transaction record and dispute or payment-protection process, and contact details should be confirmed through an independent local business source where the work is material or urgent.

EVIDENCE

- Homepage: identifies the service location as İskenderun and describes coverage of İskenderun and surrounding areas.
- Homepage: lists the names Ekrem Öztürk and Mahmut Öztürk alongside telephone contacts.
- Homepage: describes direct repair and installation services rather than a documented online checkout or booking workflow.
- Page structure: contains no service agreement, pricing schedule, license reference, or structured business profile.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate local-service website and supports a high-trust, low-risk posture. The site presents no observed scam, phishing, impersonation, or contradictory identity signals, but the real-world operator connection remains unverified; legitimacy should therefore be understood as apparent and evidence-consistent rather than proven.

Infrastructure Integrity

The website is protected by Cloudflare’s CDN/WAF infrastructure and resolves to Cloudflare edge addresses rather than an exposed origin. This is a mitigating security measure that reduces direct origin exposure and supports the integrity of the delivery layer, but it is not proof of business legitimacy.

Closing Assessment

Normal browsing and ordinary service inquiries are proportionate to the observed risk posture; credential or payment interactions should follow the independent identity, authorization, pricing, and payment-protection checks appropriate to the engagement.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of iskenderunelektrikci.com.

- The request stayed on iskenderunelektrikci.com. It was not redirected to another domain. [CLEAR](#)

- Registration is published under Isimtescil Bilisim A.S. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-07. NOTED
- The earliest public archive of this site is from 2018-08-05. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about iskenderunelektrikci.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
