

Is it-securegroup.com a scam? TrustSniffer's high-risk assessment: 0/100

it-securegroup.com

Verdict

0

OUT OF 100

CRITICAL RISK

it-securegroup.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be	Sparse landing page titled 'SafeTitan' stating a user has been assigned training and prompting to click a link to access it. No company details, forms, or navigation are present.
------------------------------	--

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://it-securegroup.com/>

What it-securegroup.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is a sparse landing page branded “SafeTitan” that tells visitors they have been assigned training and prompts them to click a link to access it. It provides no substantive explanation of the training provider, sponsoring organization, or underlying service.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. External reputation checks identified the domain as blacklisted by two sources, with 13 malicious and one suspicious detections recorded. This is a direct contradiction to treating the site as a routine training portal. The homepage compounds that concern by offering only a generic assignment prompt, with no organizational context, contact details, navigation, or explanation of why the visitor was selected. No separate brand impersonation or conflicting legal-entity identity was observed, but the confirmed blacklist status is sufficient to require a strongly cautionary posture. Abuse reports associated with the observed IP should be interpreted as shared-infrastructure context rather than definitive attribution to this domain; the IP belongs to Microsoft’s content-delivery infrastructure.

EVIDENCE

- The homepage is titled “SafeTitan” and states that a user has been assigned training, then directs the user to click a link for access.
- The homepage contains approximately 166 characters of visible text, no company details, no navigation, and no contact information.
- External reputation assessment recorded 13 malicious detections, 1 suspicious detection, and a confirmed blacklist result from two sources.
- Four abuse reports concern IP address 150.171.109.35 and are attributed to shared Microsoft infrastructure rather than conclusively to the website.

Regulatory Verification Notes

The site does not provide enough legal or organizational information to establish who operates the training service or under what authority it is offered. No licensing or registration disclosure is presented, although a licensing requirement cannot be inferred solely from the page. The available identity evidence therefore remains unverified, and the absence of corporate, contact, and service-context information is a material transparency gap for a site requesting access to assigned training.

EVIDENCE

- The homepage provides no company name, registered address, legal notice, terms, or organizational explanation.
- The homepage provides no licensing, accreditation, or registration number.
- The site contains no forms, external links, structured organization data, or substantive service description.

What to Verify Next

The purported training assignment should be confirmed through an independently established channel of the organization that allegedly issued it, rather than through the landing page itself. The organization’s legal identity and any applicable training-provider registration or accreditation should be checked against the relevant official registry, and the intended access destination should be confirmed by the organization’s known internal portal or help desk. No credentials, payment information, or other sensitive data should be submitted unless those checks independently validate the service.

EVIDENCE

- The homepage offers no independent organizational contact route through which the assignment can be authenticated.
- The site provides no stated operator, regulatory status, accreditation, or official service documentation.
- The page’s only stated function is access to an assigned training link, leaving the purpose and destination insufficiently explained.

Summary Verdict

The available evidence supports a critical-risk classification for interaction with this website. Its apparent training purpose is not sufficient to offset the confirmed external reputation contradictions, sparse identity context, and unverified operator status. The site should not be treated as an established or authenticated organizational portal.

Infrastructure Integrity

The website is served through Microsoft Corporation infrastructure on AS8075, with CDN/WAF protection and no directly observable origin candidate. Transport encryption is enabled through a domain-validated certificate issued by Go Daddy Secure Certificate Authority - G2; this provides technical protection in transit but does not establish the legitimacy of the website or overcome the external reputation findings.

EVIDENCE

- Served from AS8075, Microsoft Corporation, US; observed edge IP: 150.171.109.35.
- CDN/WAF is present; 1 edge IP was observed and 0 likely origin IPs were identified.
- TLS certificate validation level is DV, issued by Go Daddy Secure Certificate Authority - G2, valid to 2026-11-07T20:29:39+00:00.

Closing Assessment

The appropriate disposition is to suspend sensitive interaction with the site and route the matter through independently verified organizational channels before any access is attempted.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, page content, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- The page presents a sign-in form, and the operator behind it could not be independently verified.
Page content rule:PAGE_TYPE_LOGIN_UNVERIFIED
- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuselPDB: 4 reports on hosting IP 150.171.109.35 (Microsoft Corporation, Content Delivery Network), 19% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of it-securegroup.com.

- The request stayed on it-securegroup.com. It was not redirected to another domain. CLEAR
- Registration is published under Blacknight Internet Solutions Ltd.. CLEAR
- DNS for this domain is served by azure-dns.com, across 4 name servers. NOTED
- The registration is paid up to 2027-06-06. NOTED
- The earliest public archive of this site is from 2018-08-06. CLEAR
- It is hosted on MICROSOFT-CORP-MSN-AS-BLOCK, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about it-securegroup.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
