- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Itag Media is a Bundaberg, Queensland-based digital marketing agency presenting branding, website development, SEO, digital marketing, and sales enablement services for Australian businesses, supported by content marketing and lead-generation resources.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent corporate service model, named partner affiliations, client-oriented results, testimonials, and established contact pathways, with no evidence of phishing, credential harvesting, financial manipulation, brand impersonation, or other high-risk abuse. Normal interaction with the site is appropriate.

EVIDENCE

- Homepage: identifies branding, website development, digital marketing, SEO, and sales-enablement services.
- Homepage behavior: one search form was observed, with no login form, hidden sensitive form, wallet connection, or external password form.
- Domain history: domain age is 19.2 years, with the first recorded observation on 2007-05-21.
- Archive history: 251 snapshots spanning 2007-05-21 to 2026-07-28, covering 20 tracked years.

Regulatory Verification Notes

The site provides business, contact, privacy, and legal navigation, together with physical-location and partner-affiliation information. No regulated-service license claim or license number is presented in the supplied content; for a digital marketing agency, this is a limited transparency point rather than evidence of deception. The registration record identifies Web Address Registration Pty Ltd as registrar and LIGTENBERG, DAVID as owner.

EVIDENCE

- About and contact areas: provide the agency profile, contact details, team and business-practice information.
- Homepage: identifies HubSpot, Shopify, and Pipedrive partnership or affiliate relationships.
- Hosting: served from AS38880 (M21-AS-AP - Micron21 Datacentre Pty Ltd, AU).
- Transport encryption: TLS certificate issued by YR2 at DV validation level, valid to 2026-10-01.

What to Verify Next

For formal vendor onboarding, independently reconcile the agency's stated business identity and contact channels with an Australian business record, and confirm the scope and commercial terms of any proposed engagement. If a future engagement involves regulated activity beyond ordinary marketing services, confirm the applicable registration with the relevant authority.

EVIDENCE

- About and contact areas: contain the identity and contact artifacts required for independent onboarding checks.
- Services area: defines the commercial scope as professional marketing, branding, development, SEO, and sales-enablement work.
- Privacy and legal navigation: provides the relevant documents for procurement and data-handling review.

Summary Verdict

The site has a legitimate, established, and trustworthy posture with a coherent business identity and no observed scam or impersonation indicators. Normal interaction, including account login where applicable and standard use, is appropriate.

Infrastructure Integrity

The observed hosting environment is attributable to Micron21 Datacentre Pty Ltd in Australia. The supplied evidence does not establish a separate CDN, WAF, or origin-concealment posture; no adverse infrastructure condition is indicated.

Closing Assessment

The site is suitable for normal business engagement, subject to standard procurement, contractual, and data-protection checks proportionate to the proposed relationship.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=5

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

About this assessment

A trust score summarises the evidence TrustSniffer could collect about itagmedia.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
