

Is itcomm.co.id safe? TrustSniffer's low-trust assessment: 40/100

itcomm.co.id

Verdict

40

OUT OF 100

LOW TRUST

itcomm.co.id is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Corporate website for PT. Damai Sejati presenting products and solutions (IP PBX, nurse call, intercoms, cameras), blog/news posts, training and service information. Powered by WordPress with Lightning theme; content in Indonesian and other language options.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What itcomm.co.id served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website is a corporate product catalogue for PT. Damai Sejati, presenting IP PBX systems, nurse-call equipment, video and audio intercoms, home-IoT products, IP cameras, installation, training, and related support services for business and consumer customers.

Scam/Impersonation Risk

The site's visible content is consistent with a conventional communications and security-equipment supplier: it contains product categories, solution pages, training information, news content, and no observed login, credential-collection, wallet-connection, or sensitive submission forms. However, this benign page presentation is outweighed by a confirmed blacklist hit recorded for the domain, creating a material risk for sensitive interaction. The site presents PT. Damai Sejati as its operating identity, but that identity remains independently unverified; the blacklist signal therefore cannot be resolved by the site's corporate presentation alone. No separate brand-impersonation or conflicting-legal-identity finding was recorded.

EVIDENCE

- The homepage and product navigation identify IP PBX, nurse-call systems, intercoms, home IoT, and IP cameras, while the services navigation includes installation and training.
- External reputation assessment records the domain as blacklisted; one malicious and one suspicious detection were also recorded.
- The domain was registered on 2011-11-30 and has an age of 14.73 years, which indicates long registration continuity but does not neutralize the current reputation contradiction.

Regulatory Verification Notes

The available corporate and About-related content names PT. Damai Sejati and describes a reseller/integrator business model rather than a financial or investment service. No license or registration number is claimed in the supplied site analysis, so the legal operating entity, commercial authorization, and any sector-specific permissions remain verification matters rather than established facts. Countervailing technical signals include a long-established registration, a known certificate issuer, and stable corporate page content; these are establishment indicators, not independent proof of ownership or regulatory standing. No matching third-party broker profile was identified.

EVIDENCE

- The site's corporate navigation includes "About ITCOMM," "History," "Portfolio," "Brand," and "Partners," while the page title identifies PT. Damai Sejati.
- The domain was registered through PT Cloud Hosting Indonesia on 2011-11-30; the recorded expiry date is 2026-11-30.
- The site is served under a DV TLS certificate issued by YR2, valid through 2026-10-27.
- Hosting is attributed to AS136052, IDNIC-IDCLOUDHOST-AS-ID – PT Cloud Hosting Indonesia, ID.

What to Verify Next

Before any sensitive engagement, an independent party should confirm that PT. Damai Sejati is the legal entity responsible for the site by matching the About and contact information against authoritative Indonesian corporate records. The relevant business or sector registry should also be checked for any authorization required for equipment supply, installation, healthcare-related systems, or public-sector work. Commercial counterparties should obtain written quotations, warranty terms, delivery obligations, service-level commitments, and payment-protection arrangements before placing an order, and should confirm official contact channels through an independently sourced route.

EVIDENCE

- The About, History, Portfolio, and Partners pages provide the stated identity and commercial context to be matched against external records.
- The product, solution, and training sections identify the categories of goods and services for which contractual and authorization checks are relevant.
- The recorded blacklist result warrants independent confirmation of the domain and official business channels before sensitive interaction.

Summary Verdict

The overall posture is **low trust**, with a confirmed reputation contradiction and unresolved independent identity verification. Although the site has substantial, coherent corporate content and long technical continuity, those positive characteristics do not overcome the elevated risk associated with the recorded blacklist status. Sensitive interaction should therefore be treated as materially exposed.

Infrastructure Integrity

The site resolves directly to hosting associated with PT Cloud Hosting Indonesia in Indonesia, with one likely origin address and no detected CDN or WAF layer. The transport certificate is valid and issued at domain-validation level, but the hosting arrangement provides limited protective mitigation against the reputation concern.

Closing Assessment

Restrict activity to non-sensitive browsing until the operator, business standing, and official communication channels have been independently confirmed; login, credential submission, and financial transactions should not proceed beforehand.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of itcomm.co.id.

- The request stayed on itcomm.co.id. It was not redirected to another domain. [CLEAR](#)

- Registration is published under PT Cloud Hosting Indonesia. CLEAR
- DNS for this domain is served by co.id, across 2 name servers. NOTED
- The registration is paid up to 2026-11-30. NOTED
- The earliest public archive of this site is from 2013-04-13. CLEAR
- It is hosted on IDNIC-IDCLOUDHOST-AS-ID, from a server in ID. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about itcomm.co.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
