

Is ittv.com.br legit? TrustSniffer's high-trust assessment: 100/100

ittv.com.br

Verdict

100

OUT OF 100

HIGH TRUST

ittv.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 70%.

What this site appears to be

ITTV appears to be a Brazilian streaming/OTT service offering subscription plans for live TV and sports (Brasileirão Série A). The site lists plans, pricing, device support, contact email, phone and a postal address. It advertises apps on Google Play and App Store. No explicit or suspicious credential harvesting or crypto/payment-to-wallet requests are present in the captured content.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

ITTV is a Brazilian subscription streaming service presenting live television, sports programming, and Brasileirão Série A packages through a web platform, mobile applications, and partnerships with internet providers; its apparent business model is recurring monthly subscriptions for access to channels and live events.

Scam/Impersonation Risk

No contradictions were observed, including no confirmed phishing, malicious-content, blacklist, or impersonation indicators. The homepage presents a coherent commercial streaming proposition with subscription access, live sports programming, app-store availability, customer support routes, and no captured requests for cryptocurrency transfers, wallet connections, or suspicious credential submission. A name-similarity signal was not corroborated by the site content or behavioral evidence and therefore does not establish impersonation. The available evidence is consistent with an established, apparently legitimate website, although the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage identifies ITTV as a Brazilian streaming service and advertises live Brasileirão Série A programming, subscription access, and applications for Google Play and the App Store.
- The captured site behavior recorded no login form, hidden sensitive form, external password form, wallet connection, wallet-drainer activity, clipboard hijacking, or cloaking.
- External reputation checks recorded zero malicious detections, zero suspicious detections, no Google Safe Browsing malicious result, and no blacklist hit.
- The domain was registered on 2018-06-05 and is approximately 8.19 years old; archival coverage contains 52 snapshots spanning 2020-08-04 through 2026-05-07 across 7 tracked years.

Regulatory Verification Notes

The site's commercial presentation and contact information support an apparently operating subscription business, but the captured material does not provide a licensing authority or registration number for the streaming service. This is a regulatory and disclosure matter rather than evidence of a scam. The registration record names PLAY SERVICIO DE VALOR AGREGADO LTDA, but the available evidence does not independently connect that entity to the website operator; consequently, the identity assessment remains qualified. No adverse broker-reputation match was identified, although that contextual result is not a licensing determination.

EVIDENCE

- The homepage and support-oriented content present subscription plans, device information, telephone and postal contact details, and partner-provider references.
- No license number or licensing authority is evidenced in the captured legal or commercial content.
- The domain registration record lists PLAY SERVICIO DE VALOR AGREGADO LTDA as the owner, without independently verified operator attribution.
- The site is served from AS16509, Amazon.com, Inc. (AMAZON-02); its TLS certificate is issued by Starfield Secure Certificate Authority - G2, uses DV validation, and is valid through 2026-11-20.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm that the named registration entity operates the service, verify the published support channels through an offline or independently sourced route, review subscription cancellation and refund terms, and confirm payment protections offered by the selected payment method. Where licensing or content-distribution authorization is material to the intended use, the relevant Brazilian registry or rights-holder information should be checked independently.

EVIDENCE

- The captured pages provide commercial and contact disclosures but do not evidence a licensing authority or registration number.
- The service relies on recurring subscription payments and partner-provider relationships, making cancellation, refund, and payment-protection terms directly relevant.
- Applications are advertised through mainstream app stores, which provides a channel for independent application-page and publisher-identity comparison.

Summary Verdict

The overall posture is **high trust and low risk**, with evidence consistent with an established and apparently legitimate commercial website. No scam or impersonation contradictions were identified. The principal qualification is that the real-world operator has not been independently verified, so legitimacy should be understood as evidence-consistent rather than proven.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure with Cloudflare edge services also observed. The observed addresses were edge infrastructure rather than an exposed origin, providing a mitigating layer against direct origin exposure; this protection supports, but does not independently prove, legitimacy.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture, while independent merchant-identity, cancellation, refund, and payment-protection checks should be completed before submitting credentials or making a subscription payment.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ittv.com.br.

- The request stayed on ittv.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-01.net, across 4 name servers. NOTED
- The registration is paid up to 2035-06-05. CLEAR
- The earliest public archive of this site is from 2020-08-04. CLEAR
- It is hosted on AMAZON-02, from a server in BR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ittv.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
