

Is itzonex.com safe? TrustSniffer's moderate-trust assessment: 57/100

itzonex.com

Verdict

57

OUT OF 100

MODERATE TRUST

itzonex.com is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 70%.

What this site appears to be

A Chinese-language corporate/marketing site for 'One Entertainment' promoting an esports fan community platform, app downloads, merchandise (collectible blind-boxes), membership clubs and sports data/API services. Contact email and phone provided; site contains news posts and product/service descriptions.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What itzonex.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Governance Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

A Chinese-language corporate and marketing website for “One Entertainment” presents an esports fan-community platform, app distribution, membership offerings, collectible merchandise, sports-content services, and data/API capabilities, with an apparent business model based on memberships, merchandise, service contracts, and platform integrations.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other direct contradiction was observed. The reviewed landing content is consistent with a corporate entertainment proposition and describes fan-created content, esports community interaction, sports discussion, membership services, blind-box collectibles, and sports data/API offerings rather than an overtly deceptive financial scheme. The site also presented no login form, hidden form, wallet connection, or suspicious browser behavior in the reviewed interaction. However, the independently verified operator identity remains limited, and external reputation coverage was partial; accordingly, the absence of detected threats should be treated as supporting evidence rather than proof of the operator’s identity or future conduct.

EVIDENCE

- The homepage is identified as a corporate/product landing page for One Entertainment and contains substantive descriptions of esports fan-community and content-creation services.
- The reviewed page contained no detected phishing indicators, login form, hidden form, wallet-provider activity, clipboard-hijacking behavior, or suspicious inline scripts.
- The domain was registered through Gname.com Pte. Ltd. on 2025-09-08 and is approximately 0.95 years old.
- Web-archive records contain 408 snapshots spanning 2011–2026, with 16 years tracked.

Regulatory Verification Notes

The site presents a commercial entertainment and platform-services proposition, but the reviewed corporate and service content does not independently establish the legal entity operating the brand. No license claim or license number was provided in the reviewed material; this is a disclosure and verification point, not evidence of impersonation or fraud. The site's offerings—particularly memberships, merchandise sales, app distribution, and data/API services—should be assessed under the rules applicable to the relevant customer location and transaction type. The available evidence is consistent with a moderate-trust commercial website, while the operator's real-world identity remains unverified.

EVIDENCE

- The About and Services content describes esports fan communities, sports-event topic rankings, fan-brand cooperation, membership clubs, collectible merchandise, and related platform services.
- The Contact section provides a telephone contact and an email contact, but the reviewed corporate content does not state a clearly independently verifiable legal entity or registration number.
- The site is served from AS137951, identified as ASLINE-AS-AP / ASLINE LIMITED, HK.
- The site's TLS certificate is issued by YR1, uses Domain Validation (DV), and is valid to 2026-10-04.

What to Verify Next

Before high-value purchases, contractual commitments, or sensitive account activity, independently confirm the corporate entity behind One Entertainment and check any licensing or registration requirements applicable to the proposed service in the relevant jurisdiction. Validate app distribution through an independently sourced official channel, and confirm merchandise delivery, refund, membership-cancellation, and data-use terms before payment. Official contact channels should also be confirmed through an independent route rather than relying solely on the website.

EVIDENCE

- The homepage offers direct app-download and web-login access, making independent validation of the distribution channel a relevant control.
- The site navigation includes About, Services, News, and Contact sections, providing points against which corporate and commercial claims can be reconciled.
- The reviewed capture contained no sensitive submission form, so payment and credential-handling arrangements were not demonstrated by the page itself.

Summary Verdict

The website presents a **moderate-trust posture** with no observed scam or impersonation contradictions and with content and technical signals that are broadly consistent with an operating commercial platform. Its legitimacy is apparent and evidence-consistent, but the available material does not independently verify the real-world operator, so the site should not be treated as fully authenticated for high-value engagement.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, and the observed address was an edge address rather than an independently exposed origin. This reduces direct origin exposure and provides a mitigating security control, but protective hosting infrastructure alone does not establish business legitimacy.

Closing Assessment

Ordinary low-impact browsing is proportionate, while sensitive credentials, substantial payments, and binding commercial commitments should follow independent identity, channel, and transaction-protection checks.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by registration and ownership.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of itzonex.com.

- The request stayed on itzonex.com. It was not redirected to another domain. CLEAR
- Registration is published under Gname.com Pte. Ltd.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-09-08. NOTED

- The earliest public archive of this site is from 2011-02-02. CLEAR
- It is hosted on ASLINE-AS-AP, from a server in SC. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about itzonex.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
