The page as captured

<https://ixcsoft.com.br/>

What ixcsoft.com.br served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

IXC Soft is a corporate software provider serving internet service providers, presenting management platforms, operational tools, consulting, support resources, partner services, and a customer area. Its apparent business model is business-to-business SaaS, supported by software licensing, technical support, consulting, and commercial partnerships.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there was no phishing or impersonation indication, no confirmed blacklist finding, no malicious or suspicious external reputation result, and no broker-dataset match. The homepage presents a coherent corporate SaaS offering, including IXC Provedor, Inmap products, Opa! Suite, IXC Consult, IXC ACS, IXC Assina, and Olli, rather than investment, cryptocurrency, or other abuse-prone propositions. Runtime testing did identify comparatively active external requests and console errors, but these are implementation-quality signals rather than identity contradictions; the same testing found no login form, hidden sensitive form, wallet activity, clipboard manipulation, password submission to an external form, or cloaking. The available evidence therefore supports an apparently legitimate, low-risk website, while not independently proving the real-world operator identity.

EVIDENCE

- The homepage describes software and services for internet service providers and links to product, support, partner, contact, and customer-area resources.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no phishing or blacklist flag; the site's traffic ranking was 33147 and it was within the top 1 million.
- The domain was registered on 2011-12-12 and is 14.69 years old.
- Runtime telemetry recorded 12 external XHR requests, 14 external POST requests, and 16 console errors; it recorded 0 wallet-connect runs, 0 wallet-sensitive runs, and 0 wallet-drainer runs.

Regulatory Verification Notes

The site's apparent commercial activity is software provision for internet service providers, not a service for which a financial-services license is established by the supplied evidence. The website provides corporate, contact, address, product, and support information, but the applicable legal contracting entity and any sector-specific registration or authorization are not independently verified. A registration record identifies Paris e Piva Sistemas Ltda - ME, but this should be treated as a registration fact rather than conclusive proof that the entity operates or controls the website. The available third-party broker context contains no match and provides no adverse regulatory conclusion.

EVIDENCE

- The registration record lists Paris e Piva Sistemas Ltda - ME as the owner and shows an expiration date of 2032-12-12.
- The site's transport encryption uses a DV certificate issued by SSL.com TLS Issuing RSA CA R1, valid through 2027-02-19.
- Hosting telemetry identifies AS268850 - Paris e Piva Sistemas Ltda - ME, BR.

What to Verify Next

Before credential or payment interactions, an enterprise or customer should independently confirm the contracting entity, obtain applicable service terms and billing documentation, and check return, cancellation, support, and payment-protection arrangements. Where procurement rules require formal authorization, the relevant Brazilian corporate or sector registry should be checked against the entity named in the proposed agreement. Official contact channels should also be confirmed through an independent route before sensitive account changes or financial commitments.

EVIDENCE

- The site exposes dedicated About, Contact, customer-area, help-centre, and partner resources that can support a direct procurement review.
- The business model is presented as software licensing, support, consulting, and partnerships rather than a financial investment service.
- No independent operator-identity verification signal was established in the supplied evidence.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website with a high-trust and low-risk posture. The classification is supported by coherent corporate content, a long operating history, clean external reputation, and technically valid service delivery, but the real-world operator identity remains unverified; legitimacy should therefore be regarded as evidence-consistent rather than proven.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, which mitigates direct exposure of the underlying service and is a positive defensive signal. The observed edge address is 45.174.128.200 on AS268850; the origin server was not observable in this analysis. The hosting environment is associated with Paris e Piva Sistemas Ltda - ME in Brazil.

Closing Assessment

Normal business evaluation is proportionate, provided that independent counterparty, contractual, and payment-protection checks are completed before credentials or payments are submitted.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of ixcsoft.com.br.

- The request stayed on ixcsoft.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2032-12-12. CLEAR
- It is hosted on AS268850, from a server in BR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about ixcsoft.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
