

Is j-leskiss.com a scam? TrustSniffer's high-risk assessment: 5/100

j-leskiss.com

Verdict

5

OUT OF 100

CRITICAL RISK

j-leskiss.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-22 by automated analysis. Classification confidence 55%.

What this site appears to be

Small Japanese-language landing/age-gate page referencing SEO and asking if the visitor is 18+. Minimal content, no forms or monetization visible.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What j-leskiss.com served when TrustSniffer captured it on 2026-08-22. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

J-LESKISS.COM is a very small Japanese-language informational landing page that presents “SEO対策” (SEO measures) and asks visitors to confirm whether they are at least 18 years old, indicating an age-gated marketing or landing-stub purpose rather than a visible commerce, investment, or account-service model.

Scam/Impersonation Risk

The site presents a critical sensitive-interaction risk because external reputation evidence records a confirmed blacklist status and multiple malicious detections. These are direct contradictions to treating the domain as a dependable endpoint, even though the homepage itself contains no visible login form, payment flow, or clear brand-impersonation content. No conflicting legal-entity names or page-level brand impersonation were identified; the principal concern is the externally recorded reputation signal rather than an observed transaction mechanism.

EVIDENCE

- The homepage contains only the site name, an SEO reference, and an 18-plus age-gate prompt, with no visible login or payment form.
- External reputation telemetry recorded 6 malicious detections and 2 suspicious detections.
- The domain is recorded as blacklisted by external reputation sources.

Regulatory Verification Notes

The real-world operator remains unverified, and the landing page provides insufficient legal or governance information to establish who is responsible for the service. No license, registration number, or regulated-entity disclosure is presented on the reviewed page; this is a verification gap rather than, by itself, proof of a scam. The domain's long registration history and valid transport encryption are positive technical attributes, but they do not overcome the external reputation contradiction or independently establish operator legitimacy. No matching broker-reputation record was identified in the supplied third-party context.

EVIDENCE

- Domain registration: 2009-04-03T02:57:35Z; age 17.39 years; registrar GMO Internet Group, Inc. d/b/a Onamae.com; expiry 2027-04-03T02:57:35Z.
- TLS certificate: issuer YR2; validation level DV; valid to 2026-10-27T08:42:52+00:00.
- Hosting resolution: AS53850, GORILLASERVERS - GorillaServers, Inc., US.

What to Verify Next

Before any sensitive interaction, an independent source should establish the operator's legal identity and confirm whether any regulated activity is actually intended. If the site is presented as connected to a business, its contact details and any licensing claim should be checked through the relevant official registry or an independently obtained corporate channel rather than through links or details supplied solely by the landing page. Sensitive actions should remain deferred unless those checks produce a consistent, independently corroborated identity.

EVIDENCE

- The reviewed landing page does not provide a company name, license number, or registration disclosure sufficient for independent attribution.
- No signup, credential-submission, payment, or investment workflow was visible during the page review.
- The site's stated content is limited to SEO-related text and age confirmation, leaving its operational purpose insufficiently defined.

Summary Verdict

The overall posture is critical, with the available evidence unsuitable for establishing trust in sensitive interactions. The site may be viewed only as an unverified informational endpoint; the evidence does not support treating it as dependable for account access, credential handling, or financial activity.

Infrastructure Integrity

The site resolves directly to one likely origin address on GorillaServers, with no CDN or WAF detected and no edge-protection layer identified. This infrastructure is technically observable but provides no meaningful mitigating protection against the external reputation concerns.

EVIDENCE

- Infrastructure resolution identified 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- No CDN vendor was detected.
- The resolved hosting country is the US, with registry ARIN.

Closing Assessment

Prospective users should limit activity to passive viewing and use independently verified alternatives for any account, credential, or financial requirement.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of j-leskiss.com.

- The request stayed on j-leskiss.com. It was not redirected to another domain. CLEAR
- Registration is published under GMO Internet Group, Inc. d/b/a Onamae.com. CLEAR
- DNS for this domain is served by hand-spanking.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-03. NOTED
- The earliest public archive of this site is from 2009-04-21. CLEAR
- It is hosted on GORILLASERVERS, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about j-leskiss.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
