

Is jabarkhetnature.com safe? TrustSniffer's low-trust assessment: 40/100

jabarkhetnature.com

Verdict

40

OUT OF 100

LOW TRUST

jabarkhetnature.com is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Official site for Jabarkhet Nature Reserve providing information on trails, seasons, guided walks, membership and booking contact details. Clear phone numbers, email and physical address for visitor engagement.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What jabarkhetnature.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2015.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

This website presents Jabarkhet Nature Reserve as a Himalayan nature and visitor destination, offering information about conservation, trails, guided walks, seasonal visits, memberships, bookings, and related visitor services funded through bookings, memberships, and donations.

Scam/Impersonation Risk

The website's visible content is consistent with an informational tourism and nature-reserve operation: it presents trails, conservation material, visitor guidance, booking and membership options, and no login, cryptocurrency, investment, or other financial-scheme functionality was observed. However, this benign presentation is materially contradicted by external security detections, including a confirmed blacklist hit and multiple malicious or suspicious classifications associated with the assessed domain. The associated hosting IP also carries abuse reports, although those reports are attributed to shared provider infrastructure rather than specifically to the website. No brand impersonation or suspicious form behavior was observed in the captured page evidence, but the external detections warrant a clearly cautionary posture for sensitive interactions.

Evidence:

- The homepage and visitor pages describe Jabarkhet Nature Reserve, walking trails, conservation, guided visits, memberships, and bookings; no sensitive login form was observed.
- External reputation checks recorded 2 malicious and 1 suspicious detections for the assessed domain, together with a confirmed blacklist hit.
- Hosting IP 195.250.25.58 has 28 abuse reports; the attribution identifies shared WHG Hosting Services Ltd infrastructure rather than a site-specific finding.

Regulatory Verification Notes

The About, conservation, visitor, and contact content provides a coherent public-facing purpose and visitor-service model, but the available pages do not independently establish the legal entity operating the reserve or disclose a verified license or registration number. This is a regulatory and identity-verification gap rather than proof of wrongdoing. The site's apparent business model is not inherently financial, and the available third-party broker dataset contains no matching broker signal; nevertheless, the independently unverified operator identity and the external security detections prevent the site from being treated as an established verified entity.

Evidence:

- The About and contact content identifies the reserve and provides visitor-engagement details, but no independently verified legal-entity or licensing disclosure is established in the supplied evidence.
- The domain was registered on 2015-04-30 and is approximately 11.31 years old; registrar: PDR Ltd. d/b/a PublicDomainRegistry.com.
- Historical records show 125 archive snapshots spanning 2015–2026, covering 12 tracked years.
- The site uses a DV TLS certificate issued by YR2, valid until 2026-10-04.

What to Verify Next

Before any booking payment, donation, membership transaction, or submission of personal information, independently confirm that the reserve's operator, payment recipient, and visitor contact channels correspond to the physical organization represented by the site. Confirm any applicable conservation, tourism, charitable, or local operating registration directly with the relevant authority, and validate payment instructions through an independently sourced channel rather than relying solely on the website. Until those checks are complete, use the site for general informational browsing only and do not provide credentials or financial information. Evidence:

- The booking and contact functions are the site's principal transaction and engagement points.
- The supplied evidence does not independently verify the operator's legal identity or any applicable registration.
- External security detections remain unresolved despite the site's benign informational presentation.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The site appears to present a legitimate nature-reserve use case, but the apparent identity is not independently verified and the confirmed external security contradictions outweigh the otherwise coherent page content and stable technical operation.

Infrastructure Integrity

The website resolves directly to a single likely origin IP, with no CDN or WAF identified and no edge-IP layer observed. This provides limited infrastructure-level mitigation, while the hosting environment remains a shared data-center service and should not be interpreted as evidence of operator legitimacy.

Closing Assessment

Enterprise users should restrict engagement to informational browsing until the operator and transaction pathway have been independently validated; bookings, donations, membership payments, credentials, and other sensitive submissions should remain suspended pending that validation.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine.

- 01

Governance Risk
 - The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02

Sensitive Interaction Risk
 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat

Signals weighed against the site

- AbuseIPDB: 28 reports on hosting IP 195.250.25.58 (WHG Hosting Services Ltd, Data Center/Web Hosting/Transit), 49% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of jabarkhetnature.com.

- The request stayed on jabarkhetnature.com. It was not redirected to another domain.

CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com.

CLEAR
- DNS for this domain is served by isplco.com, across 2 name servers.

NOTED
- The registration is paid up to 2027-04-30.

NOTED
- The earliest public archive of this site is from 2015-10-01.

CLEAR
- It is hosted on WHG-DAL, from a server in GB.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about jabarkhetnature.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
