

Is jabrs.org a scam? TrustSniffer's high-risk assessment: 0/100

jabrs.org

Verdict

0

OUT OF 100

CRITICAL RISK

jabrs.org shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Arabic-language association site navigation and program descriptions, with privacy/contact links; includes a short English fragment mentioning a casino review and theme credit. No forms or transactional elements visible.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

Malware engines	10 flagged it VirusTotal	RISK
Google Safe Browsing	Not listed Google	CLEAR

What jabrs.org served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 1 to 3 years (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website is an Arabic-language association and organisational information site presenting navigation for its history, mission, founders, privacy policy, contact channel, and community programmes, including education for deaf people, audiology and speech services, emergency relief, and community rehabilitation. Its apparent purpose is nonprofit or informational communication rather than online commerce.

Scam/Impersonation Risk

The site has a **critical sensitive-interaction risk posture** because external security intelligence records the domain as blacklisted, with multiple malicious detections and additional suspicious classification. This signal outweighs the otherwise informational presentation and the absence of visible login, payment, or submission forms. The homepage also contains an incongruous English fragment promoting a casino review within an Arabic association site and identifying a WordPress theme credit; this is a content-integrity anomaly, although it is not by itself proof of impersonation. No conflicting legal-entity names or confirmed brand impersonation were identified in the supplied site pages.

EVIDENCE

- External security assessment recorded 10 malicious detections and 1 suspicious detection; Fortinet and Sophos were among the flagged vendors.
- The domain was recorded as blacklisted by two external sources.
- Archive records show 88 snapshots first seen on 2011-05-06 and last seen on 2025-09-10, with 15 years tracked.
- Domain registration telemetry records creation on 2024-08-02 and an age of approximately 2.05 years through PDR Ltd. d/b/a PublicDomainRegistry.com.

Regulatory Verification Notes

The available pages present an association structure and programme descriptions but do not independently verify the real-world operator or establish a regulated status. No licence claim, licensing authority, or registration number is supplied in the available evidence, leaving the organisation's legal standing and governance disclosures unclear. This is a regulatory and transparency verification gap rather than a separate finding of fraud; the decisive concern remains the external malicious and blacklist evidence described above.

EVIDENCE

- The homepage and navigation expose association, founder, programme, privacy, and contact sections but do not provide a verified legal identity or licence number in the supplied content.
- The site is hosted on AS46606, Unified Layer, United States.
- The site's TLS certificate is DV-validated, issued by YR2, and valid until 2026-10-09.

What to Verify Next

Before any sensitive interaction, an institution should independently confirm that the association exists through the relevant national or local registry and obtain the operator's legal name and registration details from an authoritative source. Contact channels should be confirmed through an independently sourced route rather than relying solely on the website. Any future request for authentication, personal information, payment, or software download should be assessed through endpoint security and fraud-control procedures before proceeding; current evidence supports limiting activity to non-interactive viewing.

EVIDENCE

- The captured homepage contains no forms, sensitive fields, login form, or transactional elements.
- The site provides privacy and contact navigation, but the supplied page content does not independently validate the associated organisation.
- The page is powered by WordPress and includes a visible theme-related fragment inconsistent with the principal association presentation.

Summary Verdict

The website should be treated as an unverified, critically unsafe destination for sensitive interaction. Its benign-looking informational content does not offset the convergent external malicious detections and confirmed blacklist status, and the operator's identity is not independently verified.

Infrastructure Integrity

The site resolves directly to a single apparent origin address on AS46606 operated by Unified Layer in the United States, with no detected CDN or WAF layer. This provides identifiable hosting context but no protective infrastructure-based mitigation for the reputation findings.

Closing Assessment

Enterprise users should restrict the site to controlled, non-sensitive observation and require independent organisational validation before permitting any operational, identity, or financial interaction.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01

Governance Risk
 - The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02

Sensitive Interaction Risk
 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of jabrs.org.

- The request stayed on jabrs.org. It was not redirected to another domain.

CLEAR
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com.

CLEAR
- DNS for this domain is served by webhostbox.net, across 2 name servers.

NOTED
- The registration is paid up to 2027-08-02.

NOTED
- The earliest public archive of this site is from 2011-05-06.

CLEAR

- It is hosted on UNIFIEDLAYER-AS-1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about jabrs.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
