

Is jacotech.org safe? TrustSniffer's moderate-trust assessment: 60/100

jacotech.org

Verdict

60

OUT OF 100

MODERATE TRUST

jacotech.org is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Dynamic Interaction Caution

Assessed 2026-08-21 by automated analysis. Classification confidence 60%.

What this site appears to be

Marketplace-style listing that promotes registration/login to a gambling/slot service (MANCINGDUIT) and encourages deposits using Indonesian e-wallets (DANA/OVO). Lacks verifiable credentials or clear legal/operational details; users may be asked to deposit funds to an external gambling operation.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What jacotech.org served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Governance Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is jacotech.org, a marketplace-style listing that promotes registration and access to the MANCINGDUIT slot/gambling service, with deposits advertised through Indonesian e-wallets and apparent monetization through player deposits or referral activity.

Scam/Impersonation Risk

No contradictions were observed: the available evidence does not indicate phishing, brand impersonation, or an active malicious-site designation. However, the homepage presents a high-stakes deposit-before-service model with an opaque value flow and no clearly identifiable underlying product. It promotes “MANCINGDUIT Login | Daftar, Deposit DANA/OVO & Slot Gacor” and describes rapid deposits and withdrawals, while the surrounding listing presents unrelated marketplace-style product information; this combination creates a material contact and transaction-integrity concern without establishing that the site is a scam. The domain’s sustained historical presence and clean available external reputation are positive indicators of an established web presence, but they do not independently establish the current operator or the legitimacy of the promoted gambling service.

EVIDENCE

- The homepage is a marketplace-style listing titled “MANCINGDUIT Login | Daftar, Deposit DANA/OVO & Slot Gacor” and directs users toward registration and deposits through DANA and OVO.
- The domain was registered on 2013-05-05 and is approximately 13.3 years old; the registrar is GoDaddy.com, LLC.
- The web archive records 560 snapshots spanning 2013–2026, covering 14 tracked years.
- Available external reputation checks reported no malicious or phishing indication; coverage was partial.

Regulatory Verification Notes

The operator’s real-world identity is not independently verified, and the available page content does not provide clear legal, licensing, or operational credentials for the gambling activity it promotes. No gambling license, licensing authority, or registration number is identified in the supplied site content. This is a regulatory and transparency verification gap rather than an identity contradiction. The page-authority signal is low, so the site’s own promotional claims should not be treated as independent validation. The technical and historical indicators support an established online presence, while the legal status of the promoted service remains unresolved.

EVIDENCE

- The homepage describes gambling access and deposit activity but does not identify a licensing authority or license number.
- The site is served from AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- The site’s TLS certificate is issued by WE1 at DV validation level and is valid until 2026-11-11T21:58:01+00:00.

What to Verify Next

Before any high-value or sensitive interaction, the prospective user should confirm the operator’s legal name and gambling authorization directly with the relevant jurisdictional regulator, establish that the intended payment recipient is the authorized operator rather than an intermediary, and independently confirm official support channels. The destination reached after registration or payment prompts should also be reviewed for withdrawal terms, dispute handling, and account controls before funds are committed.

EVIDENCE

- The homepage contains no login form or sensitive-input form, so the advertised registration and payment flow was not independently demonstrated within the captured page.
- Observed browsing activity included 56 external XHR requests and 8 external POST requests, including 5 non-whitelisted external XHR requests and 3 non-whitelisted external POST requests.
- The captured behavior produced 37 console errors across 2 successful runs.

Summary Verdict

The site has a moderate trust posture: its long-running web presence and absence of observed contradiction or active threat indicators support some confidence that it is an established online property, but the current page’s gambling-oriented deposit model and unresolved operator identity prevent a stronger legitimacy conclusion. The

available evidence is consistent with an established, apparently legitimate website, not with independently verified operator legitimacy.

Infrastructure Integrity

Cloudflare CDN and WAF protection provide a mitigating layer against direct exposure of the hosting environment. Observed addresses were Cloudflare edge servers—172.67.149.100 and 104.21.29.146—and the origin server was not observable in this analysis; this infrastructure arrangement supports delivery resilience but is not proof of the site’s legitimacy.

Closing Assessment

Ordinary browsing may proceed with care, but sensitive actions and financial commitments should follow independent identity, authorization, payment-recipient, and dispute-resolution checks.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox.

01 Governance Risk

- The public registration record for this domain is incomplete.

Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Dynamic Interaction Caution

- The page made background requests to destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_XHR
- The page sent data to a destination TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_POSTS
- The page exchanged network traffic with destinations TrustSniffer does not recognise.
Behaviour in a sandbox rule:BEHAV_NONWHITELISTED_TRAFFIC
- Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of jacotech.org.

- The request stayed on jacotech.org. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-05-05. NOTED
- The earliest public archive of this site is from 2013-10-16. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about jacotech.org at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
