

Is jamb.gov.ng legit? TrustSniffer's high-trust assessment: 100/100

jamb.gov.ng

Verdict

100

OUT OF 100

HIGH TRUST

jamb.gov.ng appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Official site of the Joint Admissions and Matriculation Board (JAMB) offering information about mandate, news, candidate services, downloadable manuals and portals for examinations and admissions processing.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What jamb.gov.ng served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This website is the public-facing portal of the Joint Admissions and Matriculation Board (JAMB), presenting admissions information, examination resources, candidate services, downloadable manuals, support facilities, and payment-related administrative functions for Nigeria's education system.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent public-service purpose, institutional mandate, candidate resources, examination systems, news, publications, and support functions rather than a deceptive commercial offer. The supplied technical and reputation checks found no phishing, impersonation, malicious, or suspicious indicators, and the site's established domain history and sovereign government namespace are consistent with an established website. The real-world operator identity is nevertheless not independently verified, so the apparent institutional identity should be treated as evidence-consistent rather than proven.

EVIDENCE

- The homepage is titled “JOINT ADMISSIONS AND MATRICULATION BOARD” and identifies the site as an official government and education portal.
- Page analysis found no red flags, no suspected brand impersonation, no hidden forms, and no external password-submission destination.
- Domain registration record: created 2008-12-25 and aged 17.65 years; registrar Upperlink Limited.
- External reputation checks recorded 0 malicious findings, 0 suspicious findings, and no blacklist or phishing result.

Regulatory Verification Notes

The site provides substantive institutional material through its About section, including the JAMB Act, mandate, mission, vision, board history, governing board, organogram, registrar, management team, offices, code of conduct, and whistle-blowing policy. This is strong on-page evidence of an organized public institution, but it does not independently establish the legal operator’s identity or constitute a separate regulatory verification. No commercial license claim or license number is presented in the supplied content; given the stated public-service model, this is a verification point rather than evidence of deception. The site’s transport security and hosting records provide additional technical consistency with a maintained institutional service.

EVIDENCE

- The About section includes the JAMB Act, governance structure, registrar and management information, offices and locations, and institutional policies.
- The site’s transport encryption uses an OV certificate issued by DigiCert Global G2 TLS RSA SHA256 2020 CA1 to Sidmach Technologies Nigeria Ltd, valid to 2026-09-24.
- Hosting is recorded on AS329023, operated by Treten Networks Limited - Treten Networks Limited, NG.
- The page carries the government namespace “gov.ng” and is classified as a government education portal.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the board’s official contact and office details through a trusted government or institutional channel, confirm that any payment destination and applicable refund or correction process correspond to the intended JAMB service, and reach candidate portals from the board’s own homepage rather than from unsolicited messages. Downloaded installers, browser tools, and manuals should be obtained only from the official site and checked against the relevant announcement or release context.

EVIDENCE

- The homepage provides Contact, Ticket/Support, Candidate, E-Facility, CAPS, IBASS, and Payment & Services areas.
- The site lists downloadable examination manuals, browser material, installer guidance, publications, and candidate-registration resources.
- The site provides institutional policies and a whistle-blowing channel that can support independent contact validation.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate public-service website with a high-trust, low-risk posture. No scam, phishing, impersonation, or other contradictory signal was identified, although the connection between the website and a real-world operating entity remains independently unverified.

Infrastructure Integrity

The site resolves directly to a single likely origin address rather than through a detected CDN or WAF edge network. Its hosting is associated with Treten Networks Limited in Nigeria and AFRINIC registry space; this is a neutral infrastructure characteristic and does not, by itself, establish or undermine legitimacy.

Closing Assessment

Normal informational use is proportionate; before submitting credentials or making payments, ordinary independent checks of the operator identity, applicable service terms, and payment protections should be completed.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of jamb.gov.ng.

- The request stayed on jamb.gov.ng. It was not redirected to another domain. CLEAR
- Registration is published under Upperlink Limited. CLEAR
- DNS for this domain is served by net.ng, across 2 name servers. NOTED

- The registration is paid up to 2027-07-25. **NOTED**
- It is hosted on Treten Networks Limited, from a server in NG. **NOTED**

About this assessment

A trust score summarises the evidence TrustSniffer could collect about jamb.gov.ng at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
