

Is jamzhu.com legit? TrustSniffer's high-trust assessment: 100/100

jamzhu.com

Verdict

100

OUT OF 100

HIGH TRUST

jamzhu.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 50%.

What this site appears to be

News and communications page for a Chinese university (南京工业大学党委宣传部) with headlines, campus news, events, media and contact/address information.

Evidence status and limitations

Evidence completeness:

UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

https://jamzhu.com/

What jamzhu.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website presents itself as an institutional news and communications portal for Nanjing Tech University's publicity department, displaying Chinese-language university headlines, campus events, research and collaboration news, admissions-related activities, student achievements, media coverage, and institutional contact information. Its apparent purpose is informational and public-relations communication rather than direct commercial activity.

Scam/Impersonation Risk

No confirmed phishing, impersonation, blacklist, malicious-content, or conflicting-identity signals were observed. The homepage metadata title, "365bet滚球网," is inconsistent with the university-news content rendered on the page and represents a content-label integrity anomaly; however, the available behavioral evidence shows no login form, sensitive form, wallet activity, cloaking, external posting, or deceptive redirection, so the anomaly is not treated as evidence of impersonation. The site's apparent legitimacy is therefore consistent with an established informational website, while its real-world operator remains independently unverified.

EVIDENCE

- The homepage metadata title is “365bet滚球网,” while the rendered page contains university communications content and no detected brand-impersonation indicator.
- Domain registration records show creation on 2018-06-29, an age of 8.15 years, and registration through NameSilo, LLC.
- The historical record reports 0 archive snapshots, with first seen on 2012-03-19, last seen on 2026-03-01, and 15 years tracked.

Regulatory Verification Notes

The observed business model is an informational university communications service, not a financial, brokerage, payment, or other regulated offering; no licensing claim or regulated-service solicitation was identified. The page includes institutional contact and address information, but the available evidence does not independently connect the domain to a verified real-world university operator. This is an identity and disclosure matter for ordinary due diligence, not a finding of fraudulent activity. External reputation checks identified no blacklist, malicious-content, or broker-dataset match, although reputation coverage was partial.

EVIDENCE

- The homepage identifies the university publicity function and provides institutional contact/address information alongside campus-news content.
- The site is hosted on AS398823, PEG-LA - PEG TECH INC, US.
- The transport certificate is issued by YR1 at DV validation level and is valid to 2026-11-18.

What to Verify Next

Before any credential submission, payment, or other non-routine interaction, an independent source should confirm that the domain is an official university communications channel and that the published contact routes are current. If the site is used for a transaction or service outside the informational content observed, the relevant merchant identity, applicable terms or return arrangements, and payment-protection options should be checked separately. Any request for credentials or payments that is not clearly supported by the university’s independently confirmed channels should be treated as outside the site’s established apparent purpose.

EVIDENCE

- The homepage is classified as an informational university-news page rather than a commercial service.
- No login form, sensitive form, untrusted form destination, or wallet-connection activity was detected during page and behavior analysis.
- The page presents dated university news, campus events, research, admissions, and media topics rather than direct monetization features.

Summary Verdict

The overall posture is high trust and low risk, and the available evidence is consistent with an established, apparently legitimate website. That classification supports normal informational use, but it does not independently prove the identity of the real-world operator.

Infrastructure Integrity

The site resolves directly to a single hosting origin, with no CDN or WAF layer detected. This architecture provides limited infrastructure-level mitigation, but it is a neutral technical characteristic and does not itself indicate maliciousness.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; before credentials or payment details are provided, independent confirmation of the operator and transaction protections should be completed.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of jamzhu.com.

- The request stayed on jamzhu.com. It was not redirected to another domain. CLEAR
- Registration is published under NameSilo, LLC. CLEAR
- DNS for this domain is served by dnsowl.com, across 3 name servers. NOTED
- The registration is paid up to 2027-06-29. NOTED
- The earliest public archive of this site is from 2012-03-19. CLEAR
- It is hosted on PEG-LA, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about jamzhu.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
