What jashaimpexindia.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents itself as the corporate site of Jasha Impex (India) Pvt. Ltd., a Rajkot-based industrial supplier offering ferrous and non-ferrous casting components, investment and sand casting, shell molding, aluminum casting, precision machining, and related parts for pump, valve, automotive, railway, electrical, and firefighting applications.

Scam/Impersonation Risk

The site's stated B2B manufacturing purpose is coherent and its visible pages contain product and service descriptions rather than overt phishing, investment, or cryptocurrency content. However, this positive presentation is outweighed by confirmed external threat detections and blacklist status. Sixteen malicious detections were recorded, including coverage from Fortinet, Kaspersky, and Sophos, and the site was subject to an automated protective response. Dynamic testing also identified two hidden forms across both successful runs and a substantial post-interaction DOM change, creating a material risk that the visible corporate presentation does not fully represent the site's active behavior. No conflicting legal-entity names or direct brand-

impersonation indicators were observed, but the confirmed blacklist and malicious detections constitute a serious contradiction to ordinary trust.

EVIDENCE

- The homepage presents Jasha Impex (India) Pvt. Ltd. as a supplier of casting and precision-machining services for industrial customers.
- External reputation testing recorded 16 malicious detections, with the domain also marked as externally blacklisted.
- Behavioral testing identified 2 hidden forms in 2 successful runs and a maximum post-interaction DOM difference of 737.
- The site's transport certificate is DV-only, which authenticates domain encryption but does not independently establish the operator's identity.

Regulatory Verification Notes

The site describes a manufacturing business and provides corporate, product, quality-assurance, and contact material, but the real-world operator remains independently unverified. No license or registration number is claimed on the reviewed pages; for this type of industrial supplier, that is a disclosure and verification matter rather than proof of misconduct. The combination of an apparently coherent corporate presentation with confirmed external threat detections means that the stated business identity should not be accepted as sufficient evidence for commercial onboarding, procurement, or payment decisions.

EVIDENCE

- The domain was registered on 2017-09-27 and is recorded as approximately 8.9 years old through PDR Ltd. d/b/a PublicDomainRegistry.com.
- The site is served from AS14670, identified as WHG-USE1 - WHG Hosting Services Ltd, GB.
- The TLS certificate was issued by YR2 at DV validation level and is valid through 2026-10-02T09:28:50+00:00.
- The company and contact material identifies Jasha Impex (India) Pvt. Ltd. and describes manufacturing services, but no licensing or registration number is claimed on the reviewed pages.

What to Verify Next

Before any commercial engagement, an independent party should confirm that Jasha Impex (India) Pvt. Ltd. is an active legal entity at the stated Rajkot address and that the named representatives, telephone channel, and contractual counterparties can be validated through an offline or independently sourced route. Any quality certifications, purchase orders, invoices, bank details, and payment instructions should be checked against independently obtained records rather than relying solely on information delivered by the website. Credentials, confidential documents, and financial information should not be submitted through the site unless the external detections have been resolved and the operator has been independently validated.

EVIDENCE

- The company page describes more than one decade of experience and identifies a Rajkot, Gujarat operating location.
- The contact material provides a telephone number, physical address, and company email channel for independent confirmation.
- The site contains no login form and no sensitive form was detected in the visible page analysis, but dynamic testing separately identified hidden forms.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. The site has a plausible industrial-business presentation, but confirmed blacklist status, malicious detections, and anomalous dynamic behavior prevent the available evidence from supporting trust in the website for credentials, confidential submissions, procurement onboarding, or financial activity.

Infrastructure Integrity

The site resolves directly to a single likely origin address on WHG Hosting Services Ltd. infrastructure, with no CDN or WAF identified. This provides limited defensive mediation between visitors and the hosting origin; the presence of a valid DV certificate supports encrypted transport only and does not mitigate the external reputation findings.

Closing Assessment

Interaction should be limited to passive review while the domain reputation and operator identity are investigated; account access, credential submission, document upload, and financial transactions should be withheld pending independent validation and resolution of the malicious detections.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE
- The page contained a form a visitor cannot see.
Behaviour in a sandbox rule:BEHAV_HIDDEN_FORMS
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of jashaimpexindia.com.

- The request stayed on jashaimpexindia.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under PDR Ltd. d/b/a PublicDomainRegistry.com. [CLEAR](#)
- DNS for this domain is served by winhostingserver.com, across 4 name servers. [NOTED](#)
- The registration is paid up to 2026-09-27. [NOTED](#)
- The earliest public archive of this site is from 2018-01-03. [CLEAR](#)
- It is hosted on WHG-USE1, from a server in GB. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about jashaimpexindia.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
