Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Polish celebrity-news and entertainment publication presenting articles, interviews, lifestyle coverage, videos, and sponsored shopping material through an advertising-supported model that also uses audience measurement and personalized marketing.

Scam/Impersonation Risk

No identity contradictions, phishing behavior, brand impersonation, or other scam indicators were observed. The site's long-established registration and dense, continuous archival record support provenance consistent with an enduring media publication rather than a recently created or repurposed property. Independent reputation telemetry was clean, and the homepage exposed no hidden or sensitive forms, untrusted form destinations, wallet-related behavior, clipboard manipulation, or cloaking.

- Domain-registration records show registration on 8 August 2013, making the domain approximately 12.99 years old; the registration is maintained through OVH SAS and currently expires on 8 August 2027.
- The web archive contains 3,821 snapshots from 18 June 2014 through 11 July 2026, spanning 13 tracked years with no gap longer than one year and no detected suspicious repurposing.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing classification, no reported infrastructure abuse, and inclusion within the top million globally ranked domains at position 59,590.
- The homepage behavior assessment found no brand impersonation, hidden forms, external password forms, suspicious inline scripts, cloaking, wallet-drainer activity, or clipboard hijacking.

Regulatory Verification Notes

The homepage identifies Wirtualna Polska as the publisher, aligning the stated media identity with the hosting organization. As a celebrity-news publication rather than a regulated financial service, the absence of a financial license claim is consistent with its apparent business activity and is not a legitimacy concern. The principal compliance consideration is data protection: the consent interface describes extensive advertising and profiling operations involving IP addresses, device and cookie identifiers, cross-site activity, device linking, and precise-geolocation processing. It provides an advanced-settings route, indicating that visitors can manage consent granularity.

- The homepage consent interface names Wirtualna Polska as the service publisher and describes processing by 1,017 IAB partners and 846 additional trusted partners.

- The homepage expressly identifies personalized advertising, audience profiling, cross-site data matching, device linking, and precise-geolocation processing as consent-controlled purposes.
- The hosting infrastructure is served from AS12827 by WirtualnaPolska – Wirtualna Polska Media S.A. in Poland.
- The site’s transport encryption uses a valid DV TLS certificate issued by RapidSSL TLS RSA CA G1, valid until 23 August 2026.

What to Verify Next

Routine due diligence should focus on privacy choices and editorial-commercial separation. Prospective users should review the advanced consent settings before accepting optional profiling, confirm the desired categories of data processing, and distinguish sponsored shopping material from independent editorial coverage. Any account-related communication should be checked against contact channels published within the site’s own legal or publisher information.

- The homepage presents a consent overlay with an advanced-settings option rather than limiting visitors to a single acceptance action.
- The homepage content mix includes both editorial celebrity coverage and sponsored shopping material, making disclosure labels relevant when assessing commercial recommendations.
- The observed homepage contained no sensitive data-entry form, while the interface separately presented a login route.
- The homepage disclosed the categories of identifiers and online-activity data used for marketing and measurement, providing a basis for an informed consent decision.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong convergence among its identifiable publishing identity, sustained provenance, clean security reputation, and mature editorial presence. No contradictory evidence undermines its stated purpose or identity.

Infrastructure Integrity

The site resolves directly to a likely origin address operated by its identified publisher-hosting organization, with no CDN or WAF detected and no edge-address layer obscuring the hosting path. The single resolved Polish address and valid encrypted transport provide a coherent infrastructure posture; these technical safeguards and alignments mitigate operational risk but are not treated independently as proof of legitimacy.

Closing Assessment

Normal interaction, including account login and standard use, is appropriate, with ordinary attention to personal privacy preferences and commercially sponsored content.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of jastrzabpost.pl.

- The request stayed on jastrzabpost.pl. It was not redirected to another domain. CLEAR
- Registration is published under OVH SAS. CLEAR
- DNS for this domain is served by wp.pl, across 2 name servers. NOTED
- The registration is paid up to 2027-08-08. NOTED
- The earliest public archive of this site is from 2014-06-18. CLEAR
- It is hosted on WirtualnaPolska, from a server in PL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about jastrzabpost.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
