

Is jaybees.com.au a scam? TrustSniffer's high-risk assessment: 0/100

jaybees.com.au

Verdict

0

OUT OF 100

CRITICAL RISK

jaybees.com.au shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Simple parked-domain landing stating the domain may be for sale, with links to Terms of Service and Privacy Policy. No service, login, or transactional functionality present.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What jaybees.com.au served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Public web-archive history exists since 1999.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

jaybees.com.au is a parked domain-for-sale landing page that presents minimal informational text, links to Terms of Service and Privacy Policy, and an invitation to inquire about purchasing the domain rather than an active product, login, or transactional service.

Scam/Impersonation Risk

The domain presents a **critical sensitive-interaction risk** because external reputation telemetry records a confirmed blacklist status and multiple malicious detections. This finding outweighs the otherwise limited functionality of the homepage: the site has no login form, payment flow, wallet connection, or active service interface, so no specific phishing mechanism or brand impersonation is visible in the captured page. The absence of an active interaction surface does not neutralize the confirmed external threat signals, and the domain should not be treated as suitable for credentials, account access, or financial activity.

EVIDENCE

- External reputation telemetry recorded 12 malicious and 2 suspicious detections from 19 evaluated results, including detections associated with Fortinet, Kaspersky, and Sophos.
- The domain was marked as blacklisted by both supplied blacklist sources; the malicious-search status was independently recorded as false.
- The homepage is a 208-character parked-domain page with no login form, sensitive form, external password form, wallet connection, or observed external network activity.

Regulatory Verification Notes

The site does not operate as an identifiable financial or commercial service in the captured state, and it makes no licensing claim or regulatory registration disclosure. Its legal-page links lead to Terms of Service and Privacy Policy content, but the landing page does not establish an operating business model beyond domain resale or inquiry handling. The available registration record names SEO WEB RECOVERY PTY LTD as the owner and Above.au Pty Limited as registrar; however, the independently verified connection between that registrant and an operating entity behind the website remains unverified. The absence of a broker-dataset match provides no regulatory endorsement or contrary legal finding.

EVIDENCE

- The homepage states that the domain may be for sale and provides an inquiry prompt rather than describing a regulated service.
- The homepage exposes Terms of Service and Privacy Policy links but no license number, regulator, or service-operator disclosure.
- Registration telemetry identifies SEO WEB RECOVERY PTY LTD as owner and Above.au Pty Limited as registrar.

What to Verify Next

Before any future use beyond passive viewing, independently confirm the legal entity associated with the domain through the relevant corporate registry and determine whether any proposed activity requires licensing. If the domain later becomes an active service, validate its official support and contact channels through an independent route, review the governing legal documents for a named entity and jurisdiction, and require payment protections appropriate to the transaction. Any change from a parked page to a login, download, payment, or account interface should trigger a fresh technical and reputation assessment.

EVIDENCE

- The present homepage provides no service terms, account workflow, payment process, or named regulatory authority to validate.
- The available registration record supplies a registrant name and registrar, but does not by itself verify that the registrant operates any future service presented on the domain.
- The captured page is informational and static in function, so future changes in functionality would materially alter the verification requirements.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The decisive concern is the convergence of confirmed external threat reputation with an unverified operating identity, despite the homepage itself being a low-functionality parked page.

Infrastructure Integrity

The domain resolves directly to a single apparent origin address, with no CDN or WAF provider detected; this provides no meaningful protective infrastructure mitigation. Hosting is attributed to Trellian Pty. Limited in Australia, and the site presents a valid domain-validated TLS certificate, which confirms transport encryption but does not establish legitimacy.

EVIDENCE

- Served from AS133618, TRELLIAN-AS-AP - Trellian Pty. Limited, AU; infrastructure data records 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- TLS certificate issuer: YR2; validation level: DV; valid to 2026-10-06T15:57:28+00:00.
- No CDN or WAF vendor was detected; the hosting registry is APNIC and the hosting country is AU.

Closing Assessment

The appropriate posture is read-only observation only; credentials, account login, downloads, and financial transactions should not be initiated unless the domain’s status and operating entity are independently re-established through trusted channels.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of jaybees.com.au.

- The request stayed on jaybees.com.au. It was not redirected to another domain. CLEAR
- Registration is published under Above.au Pty Limited. CLEAR
- DNS for this domain is served by abovedomains.com, across 2 name servers. NOTED
- The earliest public archive of this site is from 1999-11-30. CLEAR
- It is hosted on TRELLIAN-AS-AP, from a server in AU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about jaybees.com.au at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
