

Is jblackard.com a scam? TrustSniffer's high-risk assessment: 0/100

jblackard.com

Verdict

0

OUT OF 100

CRITICAL RISK

jblackard.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Very small page showing domain name and a UTC timestamp. No navigation, forms, contact, or commercial content detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

jblackard.com

Thursday, 20-Aug-2026 02:36:51 UTC

What jblackard.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2024.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

jblackard.com is a minimal parked or placeholder webpage that displays only the domain name and a UTC timestamp, with no visible navigation, service description, commercial offering, contact channel, or transaction functionality.

Scam/Impersonation Risk

Confirmed external reputation contradictions make this a critical-risk site for sensitive interaction. The domain is blacklisted by external sources, with multiple malicious and suspicious detections and threat flags from Fortinet and Sophos. No brand impersonation, login form, phishing form, or suspicious browser behavior was observed on the sparse homepage; however, the absence of an active interaction surface does not offset the confirmed reputation signals. The site's identity is not independently verified, and its minimal presentation provides no credible operating context.

EVIDENCE

- External reputation telemetry recorded 15 malicious detections and 2 suspicious detections from 22 effective evaluations; Fortinet and Sophos were identified among the flagged vendors.
- The domain was registered on 2025-11-06 and is approximately 0.78 years old; registration was through DYNADOT LLC.
- Historical telemetry records 7 archive snapshots spanning 2005–2026, with 2 years tracked.
- The homepage contains 62 characters of visible text and no forms, navigation, contact details, or commercial content.

Regulatory Verification Notes

No regulated business activity, legal entity, licence, registration number, or governing jurisdiction is presented on the available homepage. This is a material disclosure gap if the domain is intended to support financial, commercial, or other regulated activity, but the page does not currently establish any such business model. The available third-party broker-reputation context contains no matching result and should not be interpreted as a licensing or regulatory determination.

EVIDENCE

- Homepage review: no legal, licensing, corporate, terms, or regulatory disclosure was visible.
- The site is hosted on AS24940, HETZNER-AS – Hetzner Online GmbH, DE.
- The transport certificate is DV-validated, issued by YE2, and valid until 2026-10-23.
- The page is classified as a parked or placeholder landing page with no visible monetization or product.

What to Verify Next

Before any sensitive interaction is contemplated, independently establish who controls the domain and whether a legitimate business purpose exists through an offline or otherwise trusted channel. Any future claim of financial, commercial, or regulated activity should be checked directly against the relevant official registry, and endpoint security controls should be consulted regarding the external malicious detections. No credentials, financial information, downloads, or wallet authorisations should be submitted unless those checks produce independently corroborated results.

EVIDENCE

- Homepage analysis completed successfully in 2 runs, with 2 successful responses and no external XHR or POST activity.
- Behavioral testing recorded 0 wallet-connection runs, 0 hidden forms, 0 password forms, and 0 clipboard-write events.
- The page title is only “jblackard.com”; no metadata, canonical declaration, external links, or social domains were present.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The available evidence does not establish a credible operating identity or a trustworthy purpose, while confirmed external reputation contradictions

materially outweigh the site’s limited benign technical behavior.

Infrastructure Integrity

The website is protected by Cloudflare CDN/WAF infrastructure, and all observed addresses were CDN edge addresses; the origin server was not observable in this analysis. This provides a mitigating layer against direct origin exposure but is not evidence of legitimacy. The observed hosting environment is associated with Hetzner Online GmbH in Germany.

Closing Assessment

The appropriate enterprise disposition is to suspend sensitive interaction pending independent confirmation of the domain’s operator, purpose, and security standing.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%
• No on-site identity signals detected	

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of jblackard.com.

- The request stayed on jblackard.com. It was not redirected to another domain. CLEAR
- Registration is published under DYNADOT LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-06. NOTED
- The earliest public archive of this site is from 2024-08-16. CLEAR
- It is hosted on HETZNER-AS, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about jblackard.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
