

Is jetbrains.com legit? TrustSniffer's high-trust assessment: 93/100

jetbrains.com

Verdict

93
OUT OF 100

HIGH TRUST

jetbrains.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Official JetBrains corporate/product page describing IDEs, AI tooling, team solutions, education, support, and licensing; appears legitimate and informational with low risk.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What jetbrains.com served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

JetBrains is a corporate software website presenting integrated development environments, AI-assisted coding tools, team and enterprise products, educational resources, support, and software licensing for developers and organizations; its apparent business model is the sale of paid licenses, subscriptions, and enterprise solutions.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent corporate/product profile, including named IDEs, JetBrains AI tools, TeamCity, YouTrack, Datalore, and other developer products, with no indications of phishing, impersonation, cryptocurrency activity, hidden forms, or wallet-related behavior. External reputation checks were clean, and the site has a top-tier global traffic footprint. Sandbox behavior recorded suspicious inline scripting and some non-whitelisted outbound posts; these are limited behavioral observations rather than confirmed malicious activity and were not accompanied by phishing, credential-harvesting, wallet, or clipboard-hijacking indicators. The real-world operator identity remains independently unverified, so the legitimacy conclusion is evidence-consistent rather than proven.

EVIDENCE

- Homepage content is classified as a corporate/product page with no reported red flags or suspected brand impersonation.
- The homepage contains no login form, sensitive form, hidden form, wallet connection, or untrusted form destination.
- External reputation checks recorded zero malicious and zero suspicious detections, with the domain ranked 919 globally.
- Domain registration: 2001-11-09; age 24.78 years.

Regulatory Verification Notes

The site's apparent commercial activity concerns developer software, subscriptions, enterprise offerings, education, and community resources rather than a regulated financial service. Its content references support, licensing, legal terms, privacy information, and a Trust Center, but the supplied material does not establish an independently verified legal operator or provide a regulatory license number. This is a verification and disclosure point, not evidence of a scam. Registration through Network Solutions provides an established administrative record, while the site's transport security and hosting arrangements support technical continuity.

EVIDENCE

- Homepage identifies JetBrains products, AI tooling, team solutions, education, support, and licensing resources.
- Registration registrar: Network Solutions, LLC; creation date 2001-11-09; expiration date 2028-11-09.
- Hosting: AS16509, AMAZON-02 – Amazon.com, Inc., US.
- TLS certificate: Amazon RSA 2048 M01, DV validation, valid to 2026-11-12.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the legal counterparty and that the relevant account or purchase flow belongs to the intended JetBrains service. The terms, privacy, licensing, refund, and support provisions should be reviewed for the specific subscription or enterprise arrangement, and payment should use a method offering appropriate transaction protections. Official support and contact channels should be confirmed through an independent route where the transaction is material.

EVIDENCE

- Terms of Use, Privacy Notice, Opt-Out, support, licensing, and Trust Center references are present in the homepage content.
- The stated business model involves paid licenses, subscriptions, and enterprise offerings, making merchant-identity and payment-protection checks relevant.
- The site uses a valid DV TLS certificate issued by a named mainstream certificate authority.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, or identity-conflict indicators were observed, although the

operator's real-world identity is not independently verified.

Infrastructure Integrity

The website is protected by Amazon CloudFront CDN/WAF infrastructure. All observed addresses were CDN edge servers, and no origin-server candidate was identified; this reduces direct exposure of the underlying hosting environment and is a mitigating technical control, not proof of legitimacy.

Closing Assessment

Routine use is proportionate to the assessed posture, while independent merchant-identity, contractual, and payment-protection checks should precede material credential or payment commitments.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of jetbrains.com.

- The request stayed on jetbrains.com. It was not redirected to another domain. CLEAR
- Registration is published under Network Solutions, LLC. CLEAR
- DNS for this domain is served by awsdns-61.org, across 4 name servers. NOTED
- The registration is paid up to 2028-11-09. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about jetbrains.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
