

Is jiveocity.com legit? TrustSniffer's high-trust assessment: 80/100

jiveocity.com

Verdict

80

OUT OF 100

HIGH TRUST

jiveocity.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Landing page for Jiveocity, a location-based social app focused on showing who is at nearby venues and enabling group chats. Contains marketing copy and business claim CTA; no forms or payment requests visible.

Evidence status and limitations

Evidence completeness:

UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Deal places

What jiveocity.com served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Jiveocity is a location-based social application that helps visitors discover nearby bars, parks, and coffee shops, view live venue activity, and join venue-based group chats, while offering businesses the ability to claim listings and communicate with visitors.

Scam/Impersonation Risk

No contradictions were observed. The landing page presents a coherent local-social product rather than a financial solicitation, payment funnel, credential-harvesting page, or impersonation of a recognized brand. The site displays no login or sensitive-data form, and its stated mechanics—venue discovery, live counts, group chat, and business listing claims—contain no identified fraud indicators. A soft reputational signal exists at the shared-infrastructure level: abuse reports associated with a CDN IP were explicitly attributed to shared provider infrastructure, whitelisted, and assigned zero confidence, so they do not indicate that Jiveocity itself is malicious.

EVIDENCE

- The homepage describes venue discovery, live counts, venue group chats, and business listing claims; its content scan recorded no red flags.
- The homepage contained no login form, payment request, sensitive form, hidden form, wallet connection, or suspicious external submission.
- Domain registration records show registration in 2013 and an age of 13.19 years.
- Historical records show 50 archive snapshots spanning 2014–2021, covering 8 tracked years, with no suspicious repurposing or semantic drift identified.

Regulatory Verification Notes

The homepage identifies “Megalancer LLC” in its copyright footer and links to Safety, Privacy, Terms, Cookies, Support, Child Safety, and account-deletion information. The available evidence is consistent with an established, apparently legitimate software service, but it does not independently verify that entity as the real-world operator. No licensing claim or license number is presented in the supplied landing-page content; for a local social application this is principally a disclosure and applicability question rather than evidence of a scam. The available broker-reputation check produced no match.

EVIDENCE

- The homepage footer identifies “Megalancer LLC” and provides links to the site’s legal, safety, privacy, support, and account-management pages.
- The domain registrar is Squarespace Domains II LLC; the recorded registration date is 2013-06-15 and the expiration date is 2027-06-15.
- The site uses a valid DV TLS certificate issued by YR1, valid through 2026-09-19.
- The site’s transport encryption was observed as valid during technical inspection.

What to Verify Next

Before credential or payment interactions, independently confirm that Megalancer LLC is the operator of the service, review the Terms, Privacy, Child Safety, and account-deletion provisions, and confirm the official support channel through information obtained independently of the site. If the service later introduces paid business services or another regulated feature, confirm any applicable registration or licensing directly with the relevant jurisdictional registry. Standard payment protections should be used for any commercial transaction.

EVIDENCE

- The homepage provides the legal and safety page links needed for document review.
- The homepage provides a business-claim pathway that can be assessed separately from ordinary user access.
- The available evidence does not independently connect the named entity to a verified real-world operator.

Summary Verdict

The overall posture is **high trust and low risk**, with available evidence consistent with an established, apparently legitimate website and no observed scam or impersonation contradiction. The principal residual uncertainty concerns independent confirmation of the real-world operator rather than any detected malicious behavior.

Infrastructure Integrity

The site is protected by CDN/WAF infrastructure, with observed traffic served through Amazon.com, Inc.'s US infrastructure on AS16509. The observed address functioned as CDN edge infrastructure rather than an exposed origin, which reduces direct origin exposure and is a mitigating security characteristic, not proof of legitimacy.

EVIDENCE

- Hosted on AS16509, Amazon.com, Inc., US; observed edge IP: 216.198.79.1.
- CDN/WAF protection was present, with 1 edge IP observed and 0 likely origin candidates.
- The site's transport certificate used DV validation, was issued by YR1, and was valid to 2026-09-19.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture; credential or payment use should follow the independent operator, policy, contact-channel, and payment-protection checks described above.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 14 reports on hosting IP 216.198.79.65 (Vercel, Inc, Content Delivery Network), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of jiveocity.com.

- The request stayed on jiveocity.com. It was not redirected to another domain. CLEAR
- Registration is published under Squarespace Domains II LLC. CLEAR

- DNS for this domain is served by googledomains.com, across 4 name servers. NOTED
- The registration is paid up to 2027-06-15. NOTED
- The earliest public archive of this site is from 2014-01-16. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about jiveocity.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
