

Is jjtv.kr legit? TrustSniffer's high-trust assessment: 95/100

jjtv.kr

Verdict

95

OUT OF 100

HIGH TRUST

jjtv.kr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 70%.

What this site appears to be

JJTV.KR is a Korean community and media-aggregation portal featuring humor, viral videos, automotive clips, celebrities, influencers, and sexually suggestive member content. It offers registration and login, community boards, search, and member-only areas, and appears monetized through a large personalized-advertising vendor ecosystem.

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

JJTV.KR is an established Korean community and media-aggregation portal presenting humor, viral and automotive clips, celebrity and influencer material, sexually suggestive content, community boards, and member-only areas through an advertising-supported business model with account registration and login.

Scam/Impersonation Risk

No blacklist, phishing, brand-impersonation, or conflicting legal-identity indicators were observed. The login function is consistent with the portal's community model, and testing found neither credential submission to an external destination nor concealed forms. A long operating history, sustained public usage, and clean threat-reputation results provide convergent evidence that this is the legitimate site it presents itself to be.

- Domain registration records identify Inames Co., Ltd. as registrar and "factory app" as owner; registered 2019-09-02 (~6.92 years old), with expiration on 2028-09-02.
- The domain has 76 archive snapshots spanning 2016-03-06 to 2026-06-16 (11 years tracked), with no detected repurposing or semantic drift.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no search-browsing protection hit, no abuse reports, and a global traffic rank of 75,809.
- Homepage interaction testing found no hidden forms, no external password submission, no cloaking, and no suspicious inline scripts.

Regulatory Verification Notes

The observed service is an entertainment and user-community portal rather than a financial, brokerage, investment, or payment platform; no regulated financial product or licensing claim was identified. Accordingly, the absence of a financial-services authorization is not an adverse legitimacy signal. The more relevant governance consideration is privacy: the homepage supports personalized advertising, cross-site profile building, precise-geolocation requests, and device linking, making the clarity and operation of its consent and privacy disclosures material to institutional review.

- The homepage presents an advertising-funded media and community service and contains no cryptocurrency, brokerage, investment, or financial-service offering.
- The homepage's browser behavior includes a cookie-consent overlay, personalized advertising, cross-site profile building, precise-geolocation requests, and device linking.

- The site is served from AS13335 (Cloudflare, Inc., US); its DV TLS certificate is issued by WE1 and is valid to 2026-10-08.
- The observed homepage contains two forms—site search and login—and the login form has no untrusted destination.

What to Verify Next

For enterprise onboarding, the privacy notice and consent controls should be reviewed to establish the purposes, retention periods, vendor categories, and user choices associated with advertising and audience measurement. Prospective members should confirm the official contact channels independently, use a unique password, review access conditions for member-only areas, and apply appropriate content controls where adult-oriented material is unsuitable.

- The homepage exposes registration, login, community boards, search, and member-only sections.
- Interaction testing completed two successful runs without wallet-provider activity, wallet-drainer behavior, clipboard manipulation, fingerprinting, or cloaking.
- The homepage uses GNUBOARD and delivered substantial functional content rather than a parked or placeholder page.
- The observed advertising and analytics ecosystem makes consent-setting review relevant before account creation.

Summary Verdict

JJTV.KR is a legitimate, established, and trustworthy website with no observed contradictions indicating scam or impersonation. Its identity, operating continuity, reputation, functional behavior, and security posture converge convincingly in support of normal use.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with all four observed IPv4 and IPv6 addresses operating as edge servers. The origin server was not exposed during analysis, which reduces direct-origin attack surface; this is a security mitigation rather than independent proof of legitimacy.

Closing Assessment

Normal interaction, including registration, account login, and standard community use, is appropriate, subject to ordinary password hygiene, privacy-preference review, and content-suitability controls.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of jjtv.kr.

- The request stayed on jjtv.kr. It was not redirected to another domain. CLEAR
- Registration is published under Inames Co., Ltd.(http://www.inames.co.kr). CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2028-09-02. CLEAR
- The earliest public archive of this site is from 2016-03-06. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about jjtv.kr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
