

Is jobjack.co.za legit? TrustSniffer's high-trust assessment: 90/100

jobjack.co.za

Verdict

90

OUT OF 100

HIGH TRUST

jobjack.co.za appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 70%.

What this site appears to be

Marketing and product landing page for JOBJACK, a SaaS hiring/ATS product focused on predictive 'JobFIT' ranking, assessments, talent sourcing and multi-site hiring. Contains case studies, product features and calls to action to book a demo or login.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2018.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

JOBJACK is a professional business website presenting an employment-technology platform for employers that need structured recruitment, candidate assessment, and hiring workflows across multiple locations. Its apparent business model is enterprise SaaS, supported by product information, employer-focused calls to action, case studies, and separate access for job seekers and account users.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, blacklist, or malicious-content indicators. The website has a long-established registration and sustained historical presence, while external reputation checks found no malicious or suspicious classifications. Five abuse reports are associated with the observed IP address, but the evidence attributes those reports to shared infrastructure; this does not establish site-specific abuse. Overall, the site presents as apparently legitimate and consistent with an established business, although its real-world operator identity remains independently unverified.

EVIDENCE

- Domain registration: created 2017-07-14T08:12:31Z; age 9.08 years; expiry 2027-07-14T08:12:31Z.
- Web archive: 126 snapshots spanning 2018-03-03T23:39:15Z to 2026-08-09T07:05:49Z, covering 9 years with a maximum observed gap of 1 year.
- External reputation: 0 malicious and 0 suspicious detections; Google Safe Browsing malicious status false; blacklist status false.
- Abuse reporting: 5 reports against IP 31.43.160.6, confidence score 9, attributed to shared infrastructure and not specifically to the website.

Regulatory Verification Notes

The homepage describes JobFIT™ as a hiring and applicant-tracking solution offering predictive candidate ranking, assessments, talent sourcing, recruitment automation, reporting, and multi-site hiring. It cites claims including a 4.8/5 rating from 3,016 reviews, use by more than 90 employers across 5,000+ South African sites, and quantified case-study outcomes; these claims support a coherent commercial proposition but are not independent proof of operator identity or performance. The available material does not state a regulatory licence or licence number, which is a transparency item to resolve if a contracting organisation requires formal corporate or sector registration. The registration record names Jobjack, but identity verification remains incomplete. The

overall legitimacy assessment is nevertheless supported by the site's substantive content, established history, clean reputation results, and valid transport encryption.

EVIDENCE

- Registration record: organisation "Jobjack"; registrar "DIAMATRIX C.C."
- Homepage: product, case-study, employer-use, demo, login, and job-seeker content is present; no licence number is stated in the supplied page findings.
- Transport encryption: TLS certificate issued by YE1, validation level DV, valid to 2026-10-04T10:41:49+00:00.

What to Verify Next

Before credential or payment interactions, an organisation should independently confirm the contracting entity named in the proposed agreement, obtain current corporate and merchant details through an independent business channel, and review the applicable privacy, service, cancellation, and return or refund terms. Any claimed customer results or employer references should be validated through independently sourced counterparties. Official support and contact channels should also be confirmed through a separate trusted route rather than relying solely on a newly received message or link.

EVIDENCE

- Homepage: provides "Book a demo" and "Login" calls to action, indicating that commercial and account-access workflows are available.
- Site content: includes case studies, product explanations, employer claims, and policy references that can be compared with contractual documentation.
- Behavioural testing: 2 runs completed successfully; hidden forms, password-external forms, wallet connections, clipboard manipulation, and cloaking were not detected.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated SaaS function. The conclusion is strong at the website-risk level, while the legal connection between the site and an independently verified real-world operator remains unresolved.

Infrastructure Integrity

The site is protected by CDN/WAF infrastructure, with observed addresses functioning as edge servers and no origin candidate identified in the analysis. Amazon hosting provides a conventional commercial hosting context and reduces direct origin exposure; this is a mitigating security characteristic, not proof of legitimacy.

EVIDENCE

- Hosting: served from AS16509, Amazon.com, Inc. (AMAZON-02), US; observed IP country NL.
- CDN/WAF: 2 unique observed IPs, both classified as edge IPs; likely origin IP count 0.
- Edge addresses: 31.43.160.6 and 31.43.161.6.

Closing Assessment

Ordinary engagement is proportionate to the assessment, provided the prospective customer completes the stated independent entity, contractual, and payment-protection checks before submitting credentials or committing funds.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 5 reports on hosting IP 31.43.160.6 (Framer B.V., Content Delivery Network), 9% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of jobjack.co.za.

- The request stayed on jobjack.co.za. It was not redirected to another domain. CLEAR
- Registration is published under DIAMATRIX C.C.. CLEAR
- DNS for this domain is served by awsdns-47.org, across 4 name servers. NOTED
- The registration is paid up to 2027-07-14. NOTED
- The earliest public archive of this site is from 2018-03-03. CLEAR
- It is hosted on AMAZON-02, from a server in NL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about jobjack.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
