Full analysis

Overview

The website is a bare web-server directory for jodhpurfurnitureexports.com, displaying an “Index of /” page with folders and files such as `cgi-bin`, `.well-known`, and a Google-related verification file rather than a functioning furniture-export business, customer portal, or commercial service.

Scam/Impersonation Risk

No brand-impersonation, login, payment, or phishing mechanism was observed in the currently served directory page. That limited page content does not, however, offset the decisive external risk signals: the domain has been identified by multiple external sources as blacklisted, and external scanning recorded multiple malicious detections with an additional suspicious detection. The site’s present state appears inert, but the available evidence supports treating it as unsuitable for sensitive interaction. No conflicting legal-entity names were observed, so there is no identity contradiction on that specific basis.

EVIDENCE

- The homepage serves an auto-indexed directory titled “Index of /” and exposes `cgi-bin`, `.well-known`, and a Google-related filename; it contains no login or payment form.
- External scanning recorded 9 malicious detections and 1 suspicious detection for the domain.
- The domain is listed by two external blacklist sources.
- Registration continuity records the domain as created on 2019-09-24, approximately 6.91 years old; archival records contain 51 snapshots spanning 2021–2026, covering 6 tracked years.

Regulatory Verification Notes

The website does not present a company profile, terms, licensing statement, registration number, or other operating disclosure on the available page. Its real-world operator therefore remains unverified, and the page provides no basis for confirming that the domain represents the furniture-export business suggested by its name. Registration privacy is an administrative characteristic rather than proof of wrongdoing, but it does not resolve the absent business and licensing disclosures. The available third-party broker context produced no match and should not be interpreted as regulatory approval.

EVIDENCE

- The homepage contains only a directory index and no legal, corporate, licensing, or service disclosures.
- The transport certificate is valid, uses DV validation, was issued by YR2, and expires on 2026-09-27.
- No license authority or license number is claimed on the available site content.

What to Verify Next

Before any operational engagement, an independent business registry search should confirm whether the named furniture-export enterprise exists and whether its contact details match the domain. Any claimed export, trading, or payment activity should be validated through the relevant regulator or commercial registry, using contact details obtained independently rather than from the website. Account access, credential submission, and financial transactions should remain suspended unless those checks produce a consistent, independently confirmed operator.

EVIDENCE

- The available content provides no business description, customer workflow, or commercial terms to corroborate the domain's apparent name-based purpose.
- The site has no forms, external submissions, wallet interactions, or monetization elements in the observed page behavior.
- Page authority is assessed as low, consistent with the site's minimal directory-only presentation.

Summary Verdict

The website presents a **critical sensitive-interaction risk**. Its inert technical presentation does not overcome the confirmed external reputation contradictions, and the available evidence is insufficient to establish a trustworthy connection to a legitimate operating entity.

Infrastructure Integrity

The site is directly served from Namecheap infrastructure in the United States, with no CDN or WAF identified and one resolved hosting address acting as the likely origin. The confirmed technical evidence identifies AS22612 and IP address 198.54.124.92; the valid DV certificate provides transport encryption, but neither hosting infrastructure nor TLS validation establishes legitimacy.

Closing Assessment

The appropriate enterprise posture is to restrict activity to passive observation and escalate any proposed credential, account, or financial interaction for independent identity and reputation validation before proceeding.

Written analysis generated 2026-08-22 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about jodhpurfurnitureexports.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
