Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This Portuguese-language website is a career-marketing landing page for “Impulso Pro,” presenting a promise of advancement without an MBA or increased working hours and seeking visitor contact details for access to a paid online course or coaching offer.

Scam/Impersonation Risk

Confirmed external threat contradictions materially outweigh the page’s otherwise ordinary course-marketing presentation. The domain is blacklisted by multiple external sources, and threat-intelligence scanning recorded malicious classifications from numerous engines, including two major security vendors. The homepage also uses a lead-capture mechanism connected to a career-promotion offer; while no login, wallet, or payment form was observed, submitting personal information would still create a sensitive interaction with a site carrying confirmed reputation warnings. No brand impersonation or phishing form was identified in the captured page content, but the external detections support a clearly cautionary posture.

EVIDENCE

- Homepage: Portuguese-language “Impulso Pro” landing page offering career-promotion guidance and requesting visitor data for access.
- External reputation artifact: 12 malicious and 1 suspicious detections out of evaluated scans; Fortinet and Sophos were among the flagged providers.
- External reputation artifact: blacklist status confirmed by two listed sources; the general safe-browsing check was negative.
- Registration artifact: registered 2025-03-12, with a recorded age of approximately 1.44 years.

Regulatory Verification Notes

The footer identifies “Lorrana Silva Soluções Ltda” and displays a Brazilian corporate-registration identifier, while the independently recorded registrant is “LS MENTORIA E TREINAMENTO LTDA.” This difference should be reconciled before any commercial engagement, although the supplied evidence does not establish an identity contradiction across two legal or identity pages. The site presents a course or coaching business rather than a regulated financial service, and no license claim or licensing authority is disclosed in the captured content. The available identity verification remains unverified, so the footer's corporate assertion should be treated as an on-page claim rather than independent proof of the operating entity.

EVIDENCE

- Homepage footer: identifies “Lorrana Silva Soluções Ltda” and displays the identifier “50.749.900.0001-04.”
- Registration artifact: recorded owner is “LS MENTORIA E TREINAMENTO LTDA.”
- Hosting artifact: served from AS47583, AS-HOSTINGER, Hostinger International Limited, CY.
- Transport-security artifact: TLS certificate issued by YE2 at DV validation level, valid to 2026-10-03.

What to Verify Next

Before any submission or commercial commitment, independently confirm that the named Brazilian entity exists, controls the website, and is the entity responsible for the course. Confirm the applicable consumer, privacy, refund, and marketing-consent terms through independently obtained contact channels, and verify any claimed event or course affiliation outside the site. Given the confirmed reputation warnings, sensitive personal information should not be submitted unless those checks resolve the concerns.

EVIDENCE

- Homepage: contains one signup and email-capture form with a consent statement referring to Brazil's General Data Protection Law.
- Homepage: no password field, login form, wallet connection, or sensitive financial form was observed.
- Homepage: no internal or external links were present in the captured page, limiting the site's available paths to independently review policies and support information.
- Behavioral artifact: two successful observation runs recorded 24 external XHR requests and 2 non-whitelisted external requests.

Summary Verdict

The website has a **critical trust posture** and should not be treated as a dependable channel for sensitive interaction. Its ordinary educational landing-page structure does not offset the confirmed external reputation contradictions or the unresolved connection between the on-page business claim and the independently recorded registrant.

Infrastructure Integrity

The site resolves directly through Hostinger infrastructure rather than a detected CDN edge, with four likely origin addresses and no edge IPs identified. This provides a concrete hosting path and valid transport encryption, but the infrastructure offers no legitimacy assurance and does not mitigate the external reputation risk.

Closing Assessment

The proportionate decision is to restrict interaction to passive review and suspend data submission, account activity, or payment-related engagement unless independent entity and channel verification produces satisfactory results.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about jogocorporativo.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
