

Is jornaldoplanalto.com.br a scam? TrustSniffer's high-risk assessment: 0/100

jornaldoplanalto.com.br

Verdict

0

OUT OF 100

CRITICAL RISK

jornaldoplanalto.com.br shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Server response page indicating rate limit exceeded. No actionable UI, forms, or monetization present.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The checks that decide most of this verdict.

What jornaldoplanalto.com.br served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2009.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website currently presents a server-side rate-limit message rather than a functioning publication, service, commerce interface, or financial product experience. The captured material provides no actionable user interface and does not establish the site's apparent business purpose beyond the domain name.

Scam/Impersonation Risk

Confirmed external reputation contradictions make this a critical-risk website for sensitive interaction.

The domain is present in blacklist reporting, and external scanning recorded four malicious and two suspicious detections, including detections associated with Fortinet and Sophos. Two abuse reports also concern the resolved hosting IP; those reports are attributed to shared provider infrastructure rather than uniquely to the website, so they are contextual rather than conclusive site-level attribution. The site's long registration history and historical presence provide provenance context, but they do not offset the confirmed blacklist and malicious-detection signals. Identity remains unverified, and no direct impersonation or phishing form was visible in the captured page.

EVIDENCE

- Domain registration: 2013-10-14; age 12.86 years.
- Historical record: 67 archive snapshots spanning 2009–2026, covering 18 years.
- External scanning recorded 4 malicious and 2 suspicious detections; Fortinet and Sophos were among the flagged vendors.
- Two abuse reports apply to shared hosting IP 177.136.254.67 operated by EVEO S.A.

Regulatory Verification Notes

The captured site material does not present a clear legal entity, licensing claim, or license number, and the available evidence does not independently verify the operator's identity. This is a regulatory and transparency verification gap, not by itself proof of fraud; however, it is material because the site is already subject to confirmed external reputation contradictions. No match was identified in the supplied broker-reputation dataset, but that result is contextual only and does not establish authorisation, licensing, or regulatory standing.

EVIDENCE

- Homepage capture: no license claim, license number, or clear operator disclosure was available.
- Identity status: the website was not independently connected to a verified real-world operator.
- Broker-reputation context: no matching record was identified.

What to Verify Next

Before any sensitive interaction, an institution should independently confirm the operator through an authoritative corporate or regulatory registry relevant to the claimed jurisdiction and business activity. Any proposed payment, account, credential, or financial workflow should be validated through independently sourced contact channels and protected by payment-provider controls; absent successful verification, those workflows should not proceed. The site should also be re-evaluated only after it presents stable, reviewable content rather than an error response.

EVIDENCE

- The captured homepage did not provide a functioning interface from which operator, service, or transaction claims could be validated.
- The available identity evidence was insufficient for independent operator verification.
- External reputation contradictions remain unresolved in the supplied evidence.

Summary Verdict

The overall posture is critical, with confirmed reputation contradictions and an unverified operator identity. The site is not suitable for sensitive interaction, including login, credential submission, payment, or financial activity, on the evidence presently available.

Infrastructure Integrity

The domain resolves directly to infrastructure operated by EVEO S.A. in Brazil, without a detected CDN or WAF layer; this provides no meaningful protective mitigation against the reputation concerns above. Transport

encryption is present, but the certificate uses domain validation only, which confirms encrypted transport rather than organisational identity.

EVIDENCE

- Hosting: AS53107, EVEO S.A., Brazil; resolved IP 177.136.254.67.
- CDN/WAF posture: no CDN detected; 1 unique IP and 1 likely origin IP.
- TLS certificate: issuer YR2, DV validation, valid to 2026-10-19T03:52:30+00:00.

Closing Assessment

Sensitive use should be withheld unless independent operator, regulatory, and transaction-channel checks produce satisfactory results; otherwise, the domain should be treated as unsuitable for enterprise engagement.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Signals weighed against the site

- AbuseIPDB: 2 reports on hosting IP 177.136.254.67 (EVEO S.A., Data Center/Web Hosting/Transit), 1% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of jornaldoplanalto.com.br.

- The request stayed on jornaldoplanalto.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by [com.br](#), across 4 name servers. NOTED
- The registration is paid up to 2027-10-14. CLEAR
- The earliest public archive of this site is from 2009-11-11. CLEAR
- It is hosted on AS53107, from a server in BR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about jornaldoplanalto.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
