Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Juan Fernando Velasco's website is an official artist and tour site for an Ecuadorian singer-songwriter, presenting biography material, tour dates, album information, and press and booking contacts. Its apparent business model is to support artist promotion, event attendance, ticket sales, and professional bookings, generally through venues, promoters, or agents.

Scam/Impersonation Risk

No scam or impersonation contradictions were observed. The site presents a coherent artist-and-tour purpose, with no detected phishing indicators, credential-harvesting forms, financial solicitation, crypto activity, or brand-impersonation pattern. Available external reputation checks identified no malicious or suspicious detections and no confirmed blacklist hit, although external coverage was not complete. The available evidence therefore supports an apparently legitimate, low-risk website, while not independently proving the real-world operator's identity.

EVIDENCE

- The homepage is classified as an artist, tour, and official site and contains biography, event, album, press, and booking content.
- The page analysis found no login form, hidden sensitive form, password-external form, or untrusted destination.
- Domain registration records show registration in 2004, with an age of 22.59 years.
- Web-archive records show 269 snapshots spanning 2004–2026, covering 23 tracked years.

Regulatory Verification Notes

The site appears to operate as an artist and event-promotion presence rather than a regulated financial or investment service. Its biography and contact material support the stated artist identity and booking purpose, but the available evidence does not independently connect the website to a verified legal operator. No regulatory license claim or license number is presented; for this business model, that is a transparency and transaction-verification consideration rather than evidence of fraud. Any ticket or booking transaction should therefore be associated with the responsible venue, promoter, agent, or merchant before payment.

EVIDENCE

- The site is hosted on AS29802, HVC-AS – HIVELOCITY, Inc., US.
- The site's TLS certificate uses DV validation, is issued by YR2, and is valid through 2026-11-11.
- The site's page content describes an artist website providing tour, press, and booking information rather than a regulated financial service.

What to Verify Next

Before a payment or credential interaction, the relevant venue, promoter, booking agent, or merchant should be confirmed through an independently sourced channel rather than relying solely on contact details presented on the site. Event listings should be cross-checked against the named venue's official ticketing or event page, and applicable return, refund, and payment-protection terms should be reviewed before purchase. For professional bookings, the contracting legal entity and settlement instructions should be confirmed through an established offline or independently published contact route.

EVIDENCE

- The homepage provides event dates, locations, venue names, and event-status labels that can be independently cross-checked.
- The site includes dedicated biography and contact areas that can be used as reference points when validating the artist or booking relationship.

Summary Verdict

The overall posture is **high trust and low risk**, with available evidence consistent with an established, apparently legitimate website. The assessment supports normal website use in principle, but the operator's real-world identity remains unverified, so website legitimacy should not be treated as proof of the legal counterparty behind any transaction.

Infrastructure Integrity

The site resolves to a single likely origin address, with no CDN or WAF detected and no edge-layer IP infrastructure identified. This is a straightforward hosting configuration rather than a contradiction or abuse indicator; the infrastructure evidence remains consistent with ordinary website operation.

Closing Assessment

Ordinary browsing is proportionate to the assessed posture, while independent merchant-identity, refund-policy, and payment-protection checks should precede any credential submission or financial transaction.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of [juanfernandovelasco.com](#).

- The request stayed on [juanfernandovelasco.com](#). It was not redirected to another domain. CLEAR
- Registration is published under ENOM, INC.. CLEAR
- DNS for this domain is served by lineadns.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-22. NOTED
- The earliest public archive of this site is from 2004-03-29. CLEAR
- It is hosted on HVC-AS, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about juanfernandovelasco.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
