

Is just-bet.net a scam? TrustSniffer's high-risk assessment: 0/100

just-bet.net

Verdict

0

OUT OF 100

CRITICAL RISK

just-bet.net shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Marketing and informational page for 'Justbet Casino' describing casino and sportsbook features, payment methods including crypto, bonus offers, KYC/withdrawal guidance, and support channels. Claims Curaçao eGaming licence and offshore operator; solicits deposits and registration.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What just-bet.net served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2011.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Google, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Justbet Casino is an online casino and integrated sportsbook presenting slots, live-dealer games, sports wagering, promotional bonuses, and payment options including fiat currency and cryptocurrency. Its apparent business model is to attract player registrations and deposits, hold funds custodially, and process wagering and withdrawals subject to KYC and payment-method controls.

Scam/Impersonation Risk

The website presents a **critical sensitive-interaction risk**. Multiple external security services have identified the domain as malicious or blacklisted, including a malicious Google Safe Browsing result and 13 malicious detections in the evaluated reputation set. These are material contradictions that outweigh the site's functional presentation and valid transport encryption. No conflicting legal-entity names or confirmed brand-impersonation findings were supplied, but the external detections independently justify treating login, credential submission, registration, deposits, and payment activity as unsafe. The homepage also describes a deposit-before-service

model in which fiat and cryptocurrency deposits, including BTC, ETH, and USDT, are placed under platform control; this creates direct financial exposure if withdrawals or account access fail.

EVIDENCE

- The homepage contains a login interface and registration prompts for the casino and sportsbook.
- The homepage describes custodial player funds, deposits before wagering, KYC-dependent withdrawals, and payment options including BTC, ETH, and USDT.
- External reputation results record Google Safe Browsing as malicious, 13 malicious detections, and a confirmed blacklist designation.

Regulatory Verification Notes

The site's legal and regulatory presentation is not independently established by the supplied evidence. Its homepage claims a Curaçao eGaming licence, identifies licence number 8048/JAZ, and names Casbit Group N.V. as the operator, but the available analysis does not verify those claims against a regulator or establish the company's connection to the domain. The site's offshore gambling model, custodial handling of deposits, and withdrawal controls therefore require regulatory and merchant-identity verification before any financial interaction. The domain uses Dynadot LLC as registrar, while its transport certificate is domain-validated rather than an organization-validated identity signal.

EVIDENCE

- The homepage claims Curaçao eGaming licence 8048/JAZ and names Casbit Group N.V. as the operating company.
- WHOIS records show registration on 2026-02-19, an age of approximately 0.5 years, and Dynadot LLC as registrar.
- The site is served through AS13335, Cloudflare, Inc.; the TLS certificate is issued by YE2, uses DV validation, and is valid until 2026-11-13.

What to Verify Next

The claimed Curaçao authorization should be checked directly with the relevant licensing register, including whether licence 8048/JAZ is current and whether it names the same operator and domain. The legal operator, withdrawal rules, KYC requirements, and payment-protection arrangements should be confirmed through independently sourced records rather than relying on the site's own disclosures. Pending those checks, credentials, identity documents, payment details, and deposits should not be submitted; any suspected exposure should be escalated through the relevant payment provider or financial institution.

EVIDENCE

- Confirm the operator and licence details through an independent regulatory register before account creation or wagering.
- Compare independently sourced withdrawal and KYC terms with the conditions presented on the site.
- Validate official support and contact channels through an offline or independently obtained route.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The combination of confirmed external threat detections, unverified identity and regulatory claims, and a financially exposed custodial gambling model means the site should not be treated as a trustworthy destination for account, credential, or payment activity.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present and all observed addresses are CDN edge infrastructure, with no origin candidate identified in the supplied analysis. This reduces direct exposure of the underlying host and may limit certain network-level attacks, but it is only a protective infrastructure measure and does not offset the site's reputation findings.

Closing Assessment

The appropriate enterprise response is to block or isolate sensitive interaction with the domain, prevent deposits and credential submission, and investigate any prior account or payment exposure through established incident-response and financial-support channels.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

- 01 Governance Risk

 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of just-bet.net.

- The request stayed on just-bet.net. It was not redirected to another domain. CLEAR
- Registration is published under DYNADOT LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-19. NOTED
- The earliest public archive of this site is from 2011-01-21. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about just-bet.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
