

Is kalesija.ba safe? TrustSniffer's low-trust assessment: 40/100

kalesija.ba

Verdict

40

OUT OF 100

LOW TRUST

kalesija.ba is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 75%.

What this site appears to be

Official website for Općina Kalesija (municipality) with news, public notices, contact details, e-services and information about municipal departments and services.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What kalesija.ba served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website at kalesija.ba presents itself as the official website of Općina Kalesija, offering municipal news, public notices, departmental information, contact details, events, documents, and e-services for residents and visitors.

Scam/Impersonation Risk

The homepage content is consistent with a municipal public-service website and does not display phishing forms, credential-collection mechanisms, wallet functionality, or page-level impersonation indicators. However, the site is subject to confirmed blacklist detections and two malicious detections from evaluated external reputation sources. The associated hosting address also carries abuse reports attributed to shared provider infrastructure, which does not prove that the municipality or the website operator caused those reports but remains a material external risk signal. The real-world operator identity is not independently verified, and the combined signals warrant a clearly cautionary posture for login, credential, or financially consequential activity.

EVIDENCE

- The homepage is titled “Početna - Općina Kalesija” and identifies the site as the municipality’s official website.
- External reputation evaluation recorded 2 malicious detections and a confirmed blacklist result for the domain.
- The hosting IP address 65.181.113.41 has 95 abuse reports attributed to shared infrastructure operated by WHG Hosting Services Ltd.
- Historical coverage records 408 archive snapshots spanning 2004–2026, with 23 years tracked.

Regulatory Verification Notes

The site’s apparent purpose is municipal administration rather than commercial or financial activity, and its menu presents municipal departments, officials, documents, public notices, and e-services. The available evidence does not independently verify that the domain is operated by the municipality, so the on-site “official” designation should not be treated as conclusive identity proof. No licensing claim or license number is presented in the reviewed content; for a government site, this is principally a transparency and identity-verification matter rather than evidence of commercial fraud. The external broker-reputation dataset recorded no matching broker, but that result is contextual only and is not a legal or regulatory determination.

EVIDENCE

- The homepage lists municipal bodies including the municipal council, local services, internal audit, civil protection, planning, and public administration functions.
- The reviewed site content contains no stated license authority or license number.
- The domain is hosted on AS209341, WHG-FRA - WHG Hosting Services Ltd, GB.
- The site uses a valid DV TLS certificate issued by YR1, valid until 2026-10-24.

What to Verify Next

Before any sensitive interaction, an institution should confirm that kalesija.ba is linked from an independently obtained municipal or government directory and validate the municipality’s official contact channels through an offline or independently sourced route. Any e-service requiring authentication should be reached from a confirmed municipal portal rather than from an unsolicited message or unfamiliar redirect. Where an activity involves payment, personal data, or official submissions, the relevant municipal department and applicable public-sector registry should be confirmed before proceeding.

EVIDENCE

- The homepage provides navigation to “Kontakt,” “Općinski zvaničnici,” “Organizacija,” “Dokumenti,” and “E-USLUGE,” creating specific channels for independent cross-checking.
- The observed homepage contained no login form, sensitive form, hidden form, or untrusted form destination.
- The site presents six principal public-service topic areas, including municipal services, announcements, documents, events, and e-services.

Summary Verdict

The overall posture is **low trust for sensitive interaction**. The site’s municipal presentation is coherent at the content level, but the authoritative assessment is materially weakened by unresolved external contradiction signals and the absence of independently verified operator identity. Public-information viewing may be treated differently from authenticated, credential-bearing, or financial activity.

Infrastructure Integrity

The site resolves directly to a single hosting address, 65.181.113.41, operated by WHG-FRA - WHG Hosting Services Ltd in Great Britain, with no detected CDN or WAF layer. This infrastructure arrangement provides limited intermediary protection and does not offset the external reputation concerns; it should be treated only as a technical risk-mitigation consideration, not as evidence of legitimacy.

Closing Assessment

Restrict use to passive public-information viewing unless the site’s official status is independently confirmed; avoid login, credential submission, and financial actions until that confirmation is obtained.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

1 finding contributed to this verdict, raised by analysis engine, behaviour in a sandbox.

01 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- The structure of the page changed sharply while it was loading.

Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

Signals weighed against the site

- AbuseIPDB: 95 reports on hosting IP 65.181.113.41 (WHG Hosting Services Ltd, Data Center/Web Hosting/Transit), 100% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of kalesija.ba.

- The request stayed on kalesija.ba. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2004-10-25. CLEAR
- It is hosted on WHG-FRA, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about kalesija.ba at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
