

Is kamk.net safe? TrustSniffer's low-trust assessment: 40/100

kamk.net

Verdict

40

OUT OF 100

LOW TRUST

kamk.net is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

A brief personal/template homepage for Kym and Mike Kuijpers; informal text indicating the site is a placeholder and links to other pages.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://kamk.net/>

Welcome to the home of Kym and Mike Kuijpers..
and the creative silly things we do..
This is a template page..
until i can work out what the heck im doing

What kamk.net served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2010.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

What this website is

a small personal/template homepage for Kym and Mike Kuijpers, presenting informal placeholder text and navigation to creative or personal content rather than a clearly defined commercial service.

Scam/Impersonation Risk

Contradictory external reputation evidence makes this a **high-risk site for sensitive interaction**, despite the benign appearance of the homepage. The domain is blacklisted in the available external checks, with two malicious detections and one suspicious detection; this is materially inconsistent with the homepage's personal/portfolio presentation. Runtime inspection did not identify a login form, wallet activity, credential collection, or other high-risk abuse pattern, and no brand impersonation was detected, but those benign page characteristics do not offset the confirmed reputation contradiction. The site's limited content and unusually external-heavy network behavior further reduce confidence that the visible homepage adequately represents the complete risk posture.

EVIDENCE

- Homepage text identifies the site as a template and personal homepage for Kym and Mike Kuijpers, with no commercial service described.
- External reputation evaluation recorded `vt\_malicious: 2`, `vt\_suspicious: 1`, and `external\_blacklist: true`.
- Browser testing recorded `external\_xhr\_total: 6`, `external\_posts\_total: 4`, `max\_external\_pct: 98.9`, and `max\_dom\_diff\_after\_interaction: 447`; no hidden forms, password forms, wallet-provider activity, or clipboard writes were detected.
- Domain registration telemetry: registered 2012-04-12T07:20:59Z (~14.36 years old); historical coverage spans 2010–2025 with 29 archive snapshots across 16 years tracked.

Regulatory Verification Notes

The available pages present an informal personal identity rather than a legal entity, regulated business, or licensed financial service. No license, registration number, or regulatory authority is disclosed in the supplied site content; this is a transparency gap requiring independent confirmation, not by itself proof of wrongdoing. The site's identity remains unverified, and the available broker-reputation context contains no matching record. A valid transport certificate and identifiable hosting arrangement support technical availability but do not establish operator identity, authorization, or regulatory standing.

EVIDENCE

- The homepage title and body identify "Kym and Mike Kuijpers" but do not provide a legal entity, business registration, license number, or regulator.
- Registration telemetry identifies Webcentral Group Ltd as registrar.
- Hosting telemetry identifies AS216180, WHG-AUS - WHG Hosting Services Ltd, GB.
- TLS telemetry records issuer YR2, validation level DV, valid to 2026-10-01T01:35:41+00:00.

What to Verify Next

Before any sensitive interaction, an independent offline route should confirm that the domain is intentionally operated by the named individuals and that any linked destination is authorised by them. If the site is presented as supporting a regulated or financial activity, the claimed operator should be checked directly against the relevant jurisdiction's official register, including the exact legal name and permitted activity. Credentials, payment details, or financial transfers should not be submitted unless those checks resolve the external reputation contradiction and establish a trusted operating context.

EVIDENCE

- The homepage contains no login or sensitive submission form; testing recorded `forms\_total: 0` and `has\_sensitive\_form: false`.
- The site's business model was classified as personal/portfolio with no clear monetization.
- Identity verification status is unverified, with no independent identity signals recorded.
- The site's transport encryption is DV-only, which authenticates encrypted transport but not the real-world operator.

Summary Verdict

The overall posture is **low trust with elevated sensitive-interaction risk**. The available evidence does not support treating the site as an established or independently verified service for credentials, account access, payments, or other consequential activity.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present and provides a mitigating layer against direct exposure and common delivery threats. The site also resolves to hosting infrastructure operated by WHG-AUS - WHG Hosting Services Ltd in the United Kingdom; protective edge infrastructure should be regarded as a security control, not as evidence of legitimacy or operator identity.

Closing Assessment

Prospective users should restrict activity to passive viewing and defer credentials, financial transactions, or other sensitive actions until independent identity, purpose, and reputation checks produce a satisfactory result.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01 Governance Risk

 - The registration record withholds contact details for the operator.
Registration and ownership rule:KF_WHOIS_HIDDEN
 - Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.
Registration and ownership rule:KF_WHOIS_PRIVATE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - Most of what the page loaded came from other domains rather than from this one.
Behaviour in a sandbox rule:BEHAV_EXTERNAL_RATIO_HIGH

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of kamk.net.

- The request stayed on kamk.net. It was not redirected to another domain. CLEAR
- Registration is published under Webcentral Group Ltd. CLEAR
- DNS for this domain is served by server-cpanel.com, across 2 name servers. NOTED
- The registration is paid up to 2027-04-12. NOTED
- The earliest public archive of this site is from 2010-12-25. CLEAR
- It is hosted on WHG-AUS, from a server in GB. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about kamk.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
