

Is kanetec.jp legit? TrustSniffer's high-trust assessment: 90/100

kanetec.jp

Verdict

90

OUT OF 100

HIGH TRUST

kanetec.jp appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 70%.

What this site appears to be

Corporate website for Kanetec (株式会社カネテック), an established Tokyo-based industrial rubber parts manufacturer offering custom and prototype production, equipment overview, inventory and company information.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2003.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Kanetec.jp is a corporate B2B website for Kanetec (株式会社カネテック), presenting industrial rubber-processing capabilities, custom and prototype fabrication, equipment, inventory, company information, news, and contact channels for customers seeking manufactured rubber components.

Scam/Impersonation Risk

No contradictions were observed between the site's stated corporate-manufacturing purpose, its page content, and the available technical and reputational signals. The homepage describes concrete industrial services rather than financial solicitation, cryptocurrency activity, investment returns, or other abuse-prone mechanisms; it also contains no login form, hidden sensitive form, wallet connection, or detected brand-impersonation indicator. The site appears established, although the real-world operator identity remains likely rather than independently verified. Completed external checks found no malicious or suspicious findings or reported abuse associated with the observed hosting activity.

EVIDENCE

- The homepage identifies Kanetec as an industrial rubber-processing company offering one-off nonstandard parts, small-batch prototypes, rapid response, machining, equipment, and inventory.
- The homepage contains no login form or sensitive submission form; behavioral testing detected no hidden forms, wallet activity, clipboard interception, cloaking, or suspicious inline scripts.
- The domain was registered on 2002-12-04 and is approximately 23.73 years old.
- The web archive records 529 snapshots spanning 2003-10-15 to 2026-05-14, covering 24 years with a maximum gap of 3 years.

Regulatory Verification Notes

The company and overview pages provide a coherent commercial identity, describing a Tokyo-based industrial rubber manufacturer established in 1990 and identifying the business as 株式会社カネテック. The business model does not present itself as a regulated financial, investment, or brokerage service, and no licensing claim or license number is presented; this is a disclosure item for ordinary corporate verification rather than evidence of a scam. A third-party broker-reputation dataset produced no match, which is useful contextual support but is not a legal or licensing determination. The available evidence is therefore consistent with an established, apparently legitimate corporate website, while independent operator verification remains incomplete.

EVIDENCE

- The company-information pages provide company, greeting, headquarters and factory, overview, history, access, and contact sections.
- The homepage states that the business has operated since 1990 and combines manual and machine processing for industrial rubber products.
- No license authority or license number is claimed in the supplied business-profile evidence.
- The completed third-party broker-context check returned no match.

What to Verify Next

Before a commercial order or any future credential or payment interaction, the prospective counterparty should independently match the company name, Tokyo address, telephone details, quotation documents, and bank or payment instructions against an authoritative corporate source and an independently obtained contact channel. Procurement teams should also confirm applicable delivery, inspection, cancellation, warranty, and payment-protection terms in writing; if the site later introduces an account or payment workflow, that workflow should be checked against the independently confirmed business details.

EVIDENCE

- The company overview and access pages provide the identity and location details to be matched independently.
- The contact page supplies the channel through which quotations or production requests may be initiated.
- The site describes prototype, nonstandard-part, inventory, and delivery services that should be reflected consistently in any quotation or purchase documentation.

Summary Verdict

The overall posture is high trust and low risk, and the website is apparently legitimate and evidence-consistent with an established industrial manufacturer. The classification is strong, but it should not be treated as independent proof of the real-world operator’s identity.

Infrastructure Integrity

The site is hosted directly on XSERVER - Xserver Inc. in Japan rather than behind a detected CDN or WAF, with a single resolved hosting endpoint. Its valid domain-validated TLS certificate provides normal transport protection; the direct-hosting arrangement is a neutral infrastructure characteristic rather than proof of legitimacy and offers fewer edge-layer protections than a mainstream CDN deployment.

EVIDENCE

- Hosted on AS131965 (XSERVER - Xserver Inc., JP), resolved in Japan through APNIC.
- TLS certificate issued by YR1 with DV validation, valid to 2026-09-21.
- Infrastructure resolution identified 1 unique IP, 0 edge IPs, and 1 likely origin IP; no CDN was detected.

Closing Assessment

Standard browsing and ordinary business inquiry are proportionate to the assessed posture; before credentials or payment are exchanged, ordinary independent merchant-identity, contractual, and payment-protection checks should be completed.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

- First-party facts recorded during the assessment of kanetec.jp.
- The request stayed on kanetec.jp. It was not redirected to another domain. CLEAR
 - DNS for this domain is served by xserver.jp, across 5 name servers. NOTED
 - The registration is paid up to 2026-12-31. NOTED
 - The earliest public archive of this site is from 2003-10-15. CLEAR
 - It is hosted on XSERVER, from a server in JP. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about kanetec.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
