

Is karamafm.com a scam? TrustSniffer's high-risk assessment: 0/100

karamafm.com

Verdict

0

OUT OF 100

CRITICAL RISK

karamafm.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 55%.

What this site appears to be

A default/sample WordPress blog page (Karama FM) with a single 'Hello world!' post and site navigation in Arabic. No forms, commerce, or suspicious content detected.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

At a glance

What karamafm.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Google flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

Karama FM is a minimal Arabic-language WordPress blog presenting a default “Hello world!” post, informational navigation, and an apparent content-publishing purpose; the observed page does not expose commerce, account, or payment functionality.

Scam/Impersonation Risk

The site has a **confirmed external threat contradiction**: multiple independent reputation services classify the domain as malicious or suspicious, including a Safe Browsing malicious match and a blacklist result. This evidence takes precedence over the benign appearance of the homepage. The page analysis found no brand-impersonation indicators, login form, suspicious scripts, or transaction flow, but those limited observations do not resolve the external detections. No identity contradiction involving multiple legal-entity names was observed.

EVIDENCE

- External reputation checks recorded a malicious Safe Browsing result, a confirmed blacklist status, and detections from multiple security providers.
- The homepage contains a single default WordPress post and no login, password, payment, or other sensitive-input form.
- The domain was registered on 2013-02-05 and is approximately 13.54 years old.

Regulatory Verification Notes

The real-world operator remains unverified, and the site does not present a verified legal entity, licensing authority, or license number in the supplied content. This is a regulatory and transparency gap rather than an identity contradiction by itself. The site's minimal sample-page presentation provides insufficient substance to establish who operates it or whether any regulated activity is intended. The available third-party broker dataset returned no match, which is only limited contextual information and is not evidence of licensing or legitimacy.

EVIDENCE

- The observed homepage identifies the site as "Karama FM" but does not provide a verified operator identity or licensing disclosure.
- The site's transport certificate is domain-validated, issued by YR1, and valid until 2026-11-04.
- The domain resolves through AS16276, operated by OVH - OVH SAS, FR.

What to Verify Next

Before any sensitive interaction, an institution should independently establish the operator's legal identity through a reliable offline or separately sourced channel, confirm any claimed authorization with the relevant jurisdictional registry, and have security personnel validate the domain's external threat status and any associated downloads or redirects. Until those checks are completed, the site should not be used for authentication, credential submission, financial activity, or file acquisition.

EVIDENCE

- Identity verification is recorded as unverified, with no independent identity signals supplied.
- The site provides no license authority or license number in the available business-model and page-content records.
- The homepage is a sparse informational page, so it does not provide sufficient operational context for validating a business relationship.

Summary Verdict

The overall posture is **critical and unsuitable for sensitive interaction**. Available evidence supports treating the domain as an unverified, externally flagged destination rather than as an established or dependable service.

Infrastructure Integrity

A CDN/WAF layer is present, and the observed address is identified as an edge address rather than a confirmed origin. This provides some exposure mitigation but does not establish legitimacy and may limit independent

verification of the underlying hosting environment.

EVIDENCE

- One observed edge IP was recorded: 5.135.136.43.
- No origin-server candidate was identified in the infrastructure analysis.
- CDN/WAF protection was detected with one observed edge address.

Closing Assessment

Activity should remain limited to passive viewing until independent identity, authorization, and security validation are complete; sensitive credentials, financial information, and downloads should not be submitted or obtained from the site.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.
External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of karamafm.com.

- The request stayed on karamafm.com. It was not redirected to another domain.

CLEAR

- Registration is published under French Connexion SARL dba Domaine.fr. CLEAR
- DNS for this domain is served by french-connexion.com, across 2 name servers. NOTED
- The registration is paid up to 2027-02-05. NOTED
- The earliest public archive of this site is from 2013-08-04. CLEAR
- It is hosted on OVH, from a server in FR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about karamafm.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
