Full analysis

Overview

Kastrati Commerce is a corporate construction and real-estate website presenting apartment developments, including the MAX KASTRATI project, alongside the manufacture of doors, windows, and related building products. Its apparent business model is to generate revenue through property sales, construction activity, and building-product production.

Scam/Impersonation Risk

No contradictions were observed, including no blacklist or phishing indication, brand-impersonation signal, conflicting legal identity, or malicious behavioral pattern. The homepage presents a coherent local-business profile, while observed browsing found no login form, sensitive form, hidden form, wallet connection, external posting, or suspicious script activity. The site's claimed history and business presentation are consistent with a genuine construction enterprise, although the real-world operator identity is not independently verified.

Evidence:

- The homepage identifies Kastrati Commerce as a construction company and presents the MAX KASTRATI apartment project, doors, windows, gallery content, and contact pathways.

- Interactive testing recorded 2 successful runs, 0 external XHR/fetch requests, 0 hidden forms, 0 password-external forms, 0 wallet-provider detections, and 0 suspicious inline scripts.
- The domain registration record shows creation on 2023-08-09 and an age of 3.03 years.

Regulatory Verification Notes

The site's legal and commercial presentation is consistent with a construction and property-sales business, not an explicitly regulated financial service. It states that Kastrati Commerce was founded in 1990 and presents sales and administrative contact details, but it does not provide a license or registration number in the reviewed content; this is a transparency item for independent confirmation rather than evidence of impersonation. The registration record names GoDaddy.com, LLC as registrar, while the site's claimed operating history and legal identity remain unverified independently. Evidence:

- The homepage states "From 1990 to now!" and describes the company's development from wood processing into construction and related manufacturing.
- Confirmed hosting telemetry identifies AS47583, AS-HOSTINGER - Hostinger International Limited, CY.
- The site's TLS certificate is issued by YE1, uses Domain Validation (DV), and is valid through 2026-11-04.

What to Verify Next

Before any property reservation, deposit, credential submission, or other payment interaction, an independent company-registry check should connect the operating entity and authorized representatives to the business name used on the site. The MAX KASTRATI project should be checked through relevant property, permitting, title, and developer records, with written cancellation, refund, and transaction terms obtained before funds are transferred. Contact details should be confirmed through an independently sourced channel, and payment methods should provide appropriate buyer protection. Evidence:

- The homepage includes a "Buy Apartment" pathway and identifies MAX KASTRATI as a new project, supporting project-specific title, permit, and developer checks.
- The site describes more than 45,000 m² of construction, 450 apartments, and 300 parking spaces, making project-scale documentation and delivery claims material to verify.
- The contact section identifies separate sales and administration contact functions, supporting independent confirmation of authorized communication channels.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam or impersonation contradictions were identified, but the connection between the website and a verified real-world operator remains unconfirmed.

Infrastructure Integrity

The site is hosted on Hostinger International Limited infrastructure under AS47583 and resolved to 109.106.242.16 in Germany. No CDN vendor, edge IPs, or WAF layer were identified; two likely origin addresses were observed, representing a conventional hosting arrangement rather than a concealment finding. The site's valid DV TLS certificate provides a baseline transport-integrity control.

Closing Assessment

Routine engagement is proportionate to the assessment, provided ordinary independent checks of the counterparty, transaction terms, project documentation, and payment protections are completed before sensitive

or financial commitments.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about kastraticommerce.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
