Full analysis

Overview

A Kauai-branded restaurant and franchise website presenting menus, locations, promotions, franchising opportunities, event orders, a mobile application, and newsletter subscriptions for consumer engagement.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or conflicting-identity indicators were observed. The homepage presents an ordinary restaurant and franchise model, with a newsletter form collecting only a first name and email address; no login, payment, cryptocurrency, or deceptive financial features were identified. Independent reputation checks found no malicious or suspicious classification, supporting a legitimate and established identity.

EVIDENCE

- Homepage: restaurant, locations, franchising, promotions, app, and event-order content.
- Homepage: one newsletter-subscription form with no sensitive fields or untrusted destination.
- Reputation checks: zero malicious and zero suspicious detections; no blacklist finding.

Regulatory Verification Notes

The website's apparent activities are commercial food service, franchising, event orders, and consumer marketing rather than a regulated financial service. No license or registration claim is evident on the reviewed pages; this is a limited disclosure matter relevant to any jurisdiction-specific franchise or commercial diligence, not evidence of deception. The domain and site history provide strong continuity: registration through 1-Grid identifies Modern Web Presence, while sustained historical activity is consistent with an established business presence.

EVIDENCE

- Domain registration: 2001-09-20; age 24.88 years; registrar 1-Grid; registrant organization Modern Web Presence.
- Web archive: 483 snapshots from 2001-11-30 through 2026-04-30, spanning 26 years.
- TLS certificate: issued by YE2 at DV validation level, valid to 2026-10-02.

What to Verify Next

For franchise or event-order engagement, confirm the applicable commercial terms and the official business contact route through the site's Contact & Customer Care or Franchising pages. Where a transaction involves a

specific jurisdiction or contractual commitment, independently confirm the relevant franchise or business-registration details with the applicable authority.

EVIDENCE

- Homepage: links to Contact & Customer Care, Franchising, and Event Orders.
- Franchising page: appropriate source for confirming commercial opportunity terms.
- Contact & Customer Care page: appropriate source for validating official engagement channels.

Summary Verdict

The website is legitimate, established, and suitable for normal interaction, including account-related or standard consumer use where offered. Its coherent business purpose, sustained history, clean reputation, and absence of contradictory signals support a high-confidence trust posture.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with observed traffic terminating on Cloudflare edge servers rather than an exposed origin. This provides a meaningful layer of defensive mitigation, although protective hosting alone is not proof of legitimacy.

EVIDENCE

- Hosting: AS13335, CLOUDFLARENET - Cloudflare, Inc., US.
- Observed edge IP: 104.21.28.105; four observed addresses were identified as CDN edge servers.
- Infrastructure: Cloudflare CDN/WAF detected; no origin candidate was observed.

Closing Assessment

Normal browsing, login where provided, newsletter subscription, and standard consumer or business interactions are appropriate, subject to ordinary review of contractual terms for higher-value franchise or event-order commitments.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about kauai.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
