

Is kazdiyden.ru legit? TrustSniffer's high-trust assessment: 100/100

kazdiyden.ru

Verdict

100

OUT OF 100

HIGH TRUST

kazdiyden.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-09-29 by automated analysis. Classification confidence 55%.

What this site appears to be

Russian-language landing page for 'КаждыйДень' — a free Android app providing a catalog and generator of greeting cards (APK download ~12 MB). The site includes legal entity details, privacy policy, user agreement, contact email and phone, and installation instructions.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What kazdiyden.ru served when TrustSniffer captured it on 2026-09-29. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is a Russian-language informational landing page for «Каждый День», a free Android application that provides a catalogue and generator of greeting cards, daily delivery features, installation instructions, and supporting legal and privacy documentation.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent low-risk software distribution purpose, with no detected brand impersonation, phishing indicators, malicious external reputation findings, or suspicious browser behavior. The homepage does not request credentials or sensitive information, and the observed APK-download model is not accompanied by the investment, payment, or account-manipulation patterns associated with common scam sites.

EVIDENCE

- The homepage is identified as an app landing page and contains no login form, hidden form, password submission, or untrusted form destination.
- External reputation checks recorded zero malicious and zero suspicious detections, with no confirmed blacklist or phishing finding.
- Registration continuity is recorded from 2017, with an authoritative domain age of 9.18 years.
- The site's historical record contains 81 archive snapshots spanning 2017–2018, covering 2 tracked years.

Regulatory Verification Notes

The available evidence is consistent with an established, apparently legitimate website, although the real-world operator has not been independently verified. The homepage identifies an individual entrepreneur, ИП Соколова Вера Андреевна, and displays tax and registration identifiers, while the site also provides privacy and user-agreement documents, a telephone contact, and support information. No regulated financial service or licensing claim is presented; accordingly, licensing is not a substantive issue for the stated application purpose, but the operator details remain subject to ordinary independent confirmation.

EVIDENCE

- The homepage states the operator as ИП Соколова Вера Андреевна and displays ИНН 771234567890 and ОГРНИП 324770012345679.
- The privacy-policy and user-agreement pages are available from the site and are consistent with the stated software-service purpose.
- The site's TLS certificate is issued by YR1, uses DV validation, and is valid to 2026-12-27.
- The site resolves successfully over HTTPS and presents a stable informational page without sensitive data-collection forms.

What to Verify Next

Before credential or payment interactions, independently confirm the named operator and registration identifiers through the relevant official registry, and review the privacy and user-agreement terms for data handling and software-distribution conditions. For the APK, confirm that the package is obtained from the site's legitimate download path and that the installed file matches the publisher information presented by the operator. Support and any future commercial arrangements should be confirmed through an independently sourced contact route.

EVIDENCE

- The homepage provides the operator identifiers needed for an independent registry comparison.
- The site supplies installation instructions and a downloadable Android package, creating a concrete package-authenticity check.
- The privacy policy and user agreement provide the documents needed to assess data use and service conditions before broader deployment.

Summary Verdict

The overall posture is **high trust and low risk**, with multiple converging signals supporting an established, apparently legitimate website and no observed scam or impersonation contradiction. The principal qualification is that the evidence does not independently prove the real-world operator’s identity.

Infrastructure Integrity

The site is hosted directly through REG.RU infrastructure rather than a detected CDN or WAF, with two likely origin addresses exposed by resolution. This is a neutral infrastructure characteristic rather than evidence of maliciousness; the valid TLS deployment provides transport protection, while the absence of a protective edge layer means the hosting arrangement itself should not be treated as an identity signal.

EVIDENCE

- Hosted on AS197695, AS-REGRU - _Domain names registrar REG.RU_, Ltd, RU; infrastructure country recorded as RU.
- The infrastructure assessment recorded 2 unique IP addresses, 0 edge IP addresses, and 2 likely origin IP addresses.
- TLS uses issuer YR1 with DV validation and an expiry of 2026-12-27.

Closing Assessment

Routine informational use is proportionate to the evidence reviewed; before any credential or payment interaction, independent confirmation of the operator and applicable consumer protections should be completed.

Written analysis generated 2026-09-29 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of kazdiyden.ru.

- The request stayed on kazdiyden.ru. It was not redirected to another domain. CLEAR
- Registration is published under REGRU-RU. CLEAR
- DNS for this domain is served by ru., across 2 name servers. NOTED
- The registration is paid up to 2027-09-28. NOTED

- The earliest public archive of this site is from 2017-07-24. CLEAR
- It is hosted on AS-REGRU, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about kazdiyden.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
