

Is kcpu-bd.com legit? TrustSniffer's high-trust assessment: 100/100

kcpu-bd.com

Verdict

100

OUT OF 100

HIGH TRUST

kcpu-bd.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-20 by automated analysis. Classification confidence 50%.

What this site appears to be

Corporate website for Knit Concern Printing Unit, a Bangladesh-based garment printing and embroidery manufacturer established in 2003. The site describes services, production capacities, machinery, sustainability efforts, contact details, and business partners.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What kcpu-bd.com served when TrustSniffer captured it on 2026-08-20. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

Knit Concern Printing Unit is a Bangladesh-based corporate website for a B2B garment-printing and embroidery manufacturer. It presents apparel production services, work samples, machinery and capacity information, sustainability activities, buyer relationships, and contact channels, with an apparent business model based on manufacturing orders and service contracts.

Scam/Impersonation Risk

No scam, phishing, impersonation, blacklist, or identity-contradiction indicators were observed. The site presents a coherent corporate manufacturing purpose, contains no sensitive login or payment form, and shows no wallet, cryptocurrency, or deceptive interaction behavior. One abuse report is associated with the shared hosting provider's IP infrastructure, but it has zero confidence and is explicitly attributed to shared infrastructure rather than to the website itself; this is therefore a limited reputational signal, not evidence of site-level abuse.

EVIDENCE

- Homepage: Presents a consistent corporate manufacturing profile with service, production, buyer, sustainability, and contact content; no red flags were identified.
- Site behavior: Two successful runs recorded zero external posts, zero external XHR/fetch activity, no hidden forms, no password forms, and no wallet or drainer activity.
- Domain registration: Registered 2007-08-25 and approximately 19 years old.
- Web history: 69 archive snapshots spanning 2008–2026, with 19 years tracked.

Regulatory Verification Notes

The About, Company Profile, Services, Sustainability, and Contact pages provide a substantive business presentation and are consistent with an established manufacturing operation. Available evidence supports an apparently legitimate corporate website, but it does not independently verify the real-world operator behind the site. The pages do not present a licensing or corporate-registration reference; for this non-financial manufacturing business, that is a transparency and counterparty-verification matter rather than evidence of a scam. Any commercial engagement should therefore rely on independently confirmed entity details and contractual documentation.

EVIDENCE

- Hosting infrastructure: Served from AS151368, GOTMYHOST-AS-AP – GOTMYHOST, BD.
- Transport encryption: TLS certificate issued by YR1 at DV validation level, valid to 2026-10-27.
- Legal and identity pages: The site provides About, Company Profile, Sustainability, and Contact pages but does not display a licensing or registration reference.
- Archive provenance: Historical records show continuity across 2008–2026 without a detected suspicious repurposing or semantic drift.

What to Verify Next

Before credentials or payment interactions, the prospective counterparty should confirm the operating entity through the relevant Bangladesh corporate or commercial registry and reconcile that entity with the company profile and contractual documents. Contact channels should be confirmed through an independently obtained business record or offline route, and procurement should require written commercial terms, delivery responsibilities, dispute provisions, and payment protection appropriate to the transaction.

EVIDENCE

- About and Company Profile pages: Use the stated corporate identity as the reference point for independent registry and counterparty checks.
- Contact page: Confirm that independently sourced contact details reach the same business before exchanging sensitive information.
- Commercial engagement process: Obtain signed order documentation and payment-protection terms before funds or credentials are provided.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. This classification supports ordinary business interaction, while the operator's real-world identity remains independently unverified and is not proven solely by the site's presentation.

Infrastructure Integrity

The site resolves to a single likely origin address hosted by GOTMYHOST-AS-AP – GOTMYHOST in Bangladesh on AS151368, with no CDN detected. The transport layer uses a valid DV certificate issued by YR1; the hosting and encryption posture provide useful operational mitigation but do not, by themselves, establish the operator's identity.

Closing Assessment

Ordinary engagement is proportionate, provided standard procurement controls and independent counterparty, commercial-term, and payment-protection checks are completed before sensitive or financial interactions.

Written analysis generated 2026-08-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 1 report on hosting IP 160.187.131.57 (GOTMYHOST, Data Center/Web Hosting/Transit), 0% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of kcpu-bd.com.

- The request stayed on kcpu-bd.com. It was not redirected to another domain. CLEAR
- Registration is published under NAMECHEAP INC. CLEAR
- DNS for this domain is served by itsourcebd.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-25. NOTED
- The earliest public archive of this site is from 2008-09-19. CLEAR
- It is hosted on GOTMYHOST-AS-AP, from a server in BD. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about kcpu-bd.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
