

Is kempenfietst.be safe? TrustSniffer's low-trust assessment: 40/100

kempenfietst.be

Verdict

40

OUT OF 100

LOW TRUST

kempenfietst.be is low-trust and potentially risky.

Several risk patterns were present. Do not send money or personal details until you have verified this business another way.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-21 by automated analysis. Classification confidence 55%.

What this site appears to be

Local Belgian charity event site (Kempen-Fietst) describing a fundraising cycling event for cancer patient support, with event routes, partner/sponsor info, beneficiary organisations, and contact details. Mostly informational and community-oriented.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

What kempenfietst.be served when TrustSniffer captured it on 2026-08-21. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2014.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

The website is a local Belgian charity-event site presenting the Kempen-Fietst fundraising cycling event, including routes, partner and sponsor information, beneficiary organisations, volunteer details, and contact information; its apparent model is to support cancer-patient comfort through participant registrations, sponsorships, and donations.

Scam/Impersonation Risk

No conflicting legal identities or apparent brand impersonation were observed in the supplied page content, and the homepage presents a coherent community fundraising purpose without login forms, payment forms, or other sensitive input mechanisms. However, the domain has a confirmed blacklist result supported by two external sources, including three malicious detections. This is a material contradiction to the benign charity presentation and warrants a security-forward posture; the page's informational appearance does not neutralise the external threat signal.

EVIDENCE

- The homepage describes a local fundraising cycling event supporting cancer-patient organisations and contains no detected login or sensitive form.
- External reputation checks recorded 3 malicious detections and a confirmed blacklist result across 2 external sources.
- The domain was registered on 2012-02-22 and is approximately 14.5 years old.
- Archive records show first observation on 2014-05-17, last observation on 2025-11-03, and 12 years tracked.

Regulatory Verification Notes

The site's apparent charitable purpose is clear, but the available material does not independently verify the legal operator or establish a regulated status. No license claim or license number is identified in the supplied content; for a fundraising site, this is a transparency item requiring confirmation rather than standalone evidence of misconduct. Identity linkage is assessed as likely, not verified, and the site's low page-authority profile provides limited independent corroboration.

EVIDENCE

- The homepage identifies the Kempen-Fietst event, its routes, partners, sponsors, beneficiary organisations, and contact information.
- The supplied site content contains no identified license authority or registration number.
- The site is hosted on AS13335 (CLOUDFLARENET - Cloudflare, Inc., US).
- The transport certificate is issued by WE1 at DV validation level and is valid to 2026-10-21.

What to Verify Next

Before any registration, donation, or other sensitive interaction, the event's beneficiary organisations and payment arrangements should be confirmed using contact details obtained independently from an established offline or institutional source. Any charitable registration or collection authority relevant to the event should be checked with the appropriate Belgian registry, and the event's official contact channels should be corroborated through the named partner or beneficiary organisations.

EVIDENCE

- The homepage provides the event description, beneficiary information, partner references, and contact points needed for independent corroboration.
- The supplied content does not identify a licensing authority or registration number to validate.
- Three social-media domains are linked from the site and may provide an additional independent route for confirming event ownership and current activity.

Summary Verdict

The overall posture is **low trust**, with elevated risk attached to sensitive interactions. Although the website presents a plausible community-charity narrative and its identity linkage is assessed as likely, the confirmed

external reputation contradiction prevents the site from being treated as trustworthy for credentials, registration, donation, or financial activity.

Infrastructure Integrity

Cloudflare CDN and WAF protection provide a mitigating layer against direct exposure of the hosting environment, with all observed addresses belonging to Cloudflare edge infrastructure and no origin candidate identified. This protects network exposure but does not establish the legitimacy of the website or offset the external threat detections.

Closing Assessment

Prospective users should restrict activity to passive viewing until the event, beneficiary relationships, and official contact channels have been independently confirmed; sensitive submissions and payments should not proceed beforehand.

Written analysis generated 2026-08-21 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, behaviour in a sandbox.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Sensitive Interaction Risk

 - The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
Analysis engine signal:direct_threat
 - The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of kempenfietst.be.

- The request stayed on kempenfietst.be. It was not redirected to another domain. [CLEAR](#)

- DNS for this domain is served by cloudflare.com. NOTED
- The earliest public archive of this site is from 2014-05-17. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about kempenfietst.be at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
